ideas for dissertation topics in psychology: Research Methods in Practice Dahlia K. Remler, Gregg G. Van Ryzin, 2014-03-24 The Second Edition of Research Methods in Practice: Strategies for Description and Causation sets an entirely new standard for presenting and learning research methods. The perspective gained from this text makes it a truly necessary tool for such applied disciplines as public affairs and administration, public policy, psychology, urban affairs, education, sociology, social work, business, public health, political science, economics, communications and criminal justice. Imbued with a deep commitment to make social and policy research methods accessible and meaningful, the Second Edition of Research Methods in Practice: Strategies for Description and Causation compels and inspires students to truly grasp the logic—and limits—of the latest research appearing in academic journals, government reports, and the media. Authors Dahlia K. Remler and Gregg G. Van Ryzin cover the most pertinent issues and methods, emphasizing the critical interpretation and practical application of research findings. Both causation and description—and the distinction between them—are emphasized and maintained thematically throughout the text. Concepts are taught through in-depth examples, such as “Fighting Malaria in Kenya,” “The U.S. Poverty Measure,” “The Fallout from Hurricane Katrina,” “Family Dinners and Teenage Substance Abuse,” and “The Effect of Poverty on Mental Health.” The realistic trade-offs, uncertainties, habits, and excitement of the research experience come through on every page. “This is the best text available for teaching students the fundamentals of research design and statistics, and for introducing them to the difficulties inherent in evaluation research and causal inference.” —Dave E. Marcotte, University of Maryland, Baltimore County

Ceynar, 2024-07-29 This volume serves as a companion to *Early Psychological Research Contributions from Women of Color, Volume I*. It focuses on the dissertations of 20 builders, women of color who earned their doctoral degrees in psychology prior to 1990 and who were leaders in the field through their leadership or innovation. An introductory chapter bridges the two volumes. Each subsequent chapter summarizes and examines a dissertation using a consistent format, including a biographical

sketch of the builder with an emphasis on her significant contribution to an organization or innovation that moved the field forward, a summary of the dissertation, a reproducibility critique of the dissertation, and an alternative framework section that analyzes the dissertation from a modern theoretical perspective or methodological approach (e.g., feminist theory, liberation psychology, mestiza consciousness, etc.). The topics cover the breadth of the discipline of psychology, including physiological, cognitive, developmental, social, and clinical. Some topics are also relevant to business, education, medicine, and social work. The varying nature of these dissertations allows the book to be used to augment coursework either as a complete collection or as individual chapters. This volume is intended for both instructors and students. The course activities provide examples of how to integrate key aspects of the dissertation research into the classroom. The volume was written with upper-level undergraduate students in mind so that it could be used across the psychology curriculum, but the editors envision this book as a potential graduate-level text as well.
