ideas for a how to speech: The Origin of Ideas Mark Turner, 2014-01-02 What makes human beings so innovative, so adept at rapid, creative thinking? Where do new ideas come from, and once we have them, how can we carry them mentally into new situations? What allows our thinking to range easily over time, space, causation, and agency-so easily that we take this truly remarkable ability for granted? In *The Origin of Ideas*, Mark Turner offers a provocative new theory to answer these and many other questions. While other species do what we cannot-fly, run amazingly fast, see in the dark-only human beings can innovate so rapidly and widely. Turner argues that this distinctively human spark was an evolutionary advance that developed from a particular kind of mental operation, which he calls blending: our ability to take two or more ideas and create a new idea in the blend. Turner begins by looking at the lionman, a 32,000-year-old ivory figurine, one of the earliest examples of blending. Here, the concepts lion and man are merged into a new figure, the lionman. Turner argues that at some stage during the Paleolithic Age, humans reached a tipping point. Before that, we were a bunch of large, unimaginative mammals. After that, we were poised to take over the world. Once biological evolution hit upon making brains that could do advanced blending, we possessed the capacity to invent and maintain culture. Cultural innovation could then progress by leaps and bounds over biological evolution itself, leading to the highest forms of human cognition and creativity. For anyone interested in how and why our minds work the way they do, *The Origin of Ideas* offers a wealth of original insights-and is itself a brilliant example of the innovative thinking it describes.

In this 2007 book, leading figures in the study of comparative constitutionalism and comparative constitutional politics from North America, Europe and Australia discuss the dynamic processes whereby constitutional systems influence each other. They explore basic methodological questions which have thus far received little attention, and examine the complex relationship between national and supranational constitutionalism - an issue of considerable contemporary interest in Europe.
