ideas for demonstrative speech: Approaches to Legal Rationality Dov M. Gabbay, Patrice Canivez, Shahid Rahman, Alexandre Thiercelin, 2010-10-04 Legal theory, political sciences, sociology, philosophy, logic, artificial intelligence: there are many approaches to legal argumentation. Each of them provides specific insights into highly complex phenomena. Different disciplines, but also different traditions in disciplines (e.g. analytical and continental traditions in philosophy) find here a rare occasion to meet. The present book contains contributions, both historical and thematic, from leading researchers in several of the most important approaches to legal rationality. One of the main issues is the relation between logic and law: the way logic is actually used in law, but also the way logic can make law explicit. An outstanding group of philosophers, logicians and jurists try to meet this issue. The book is more than a collection of papers. However different their respective conceptual tools may be, the authors share a common conception: legal argumentation is a specific argumentation context.

ideas for demonstrative speech: Platonic Coleridge James Vigus, 2009 The ambivalent curiosity of the young poet Samuel Taylor Coleridge (1772-1834) towards Plato - 'but I love Plato - his dear gorgeous nonsense!' - soon developed into a philosophical project, and the mature Coleridge proclaimed himself a reviver of Plato's unwritten or esoteric 'systems'. James Vigus's study traces Coleridge's discovery of a Plato marginalised in the universities, and examines his use of German sources on the 'divine philosopher', and his Platonic interpretation of Kant's epistemology. It compares Coleridge's figurations of poetic inspiration with models in the Platonic dialogues, and investigates whether Coleridge's esoteric 'system' of philosophy ultimately fulfilled the Republic's notorious banishment of poetry.

ideas for demonstrative speech: Rhetoric and Human Consciousness Craig R. Smith, 2012-12-04 The latest edition of Rhetoric and Human Consciousness remains a well-researched, accessible examination of rhetorical theory in Western civilization. Smith's coverage of the major figures who advanced rhetoric is strengthened by his keen analysis of developments in rhetorical

theory that resulted from its interaction with other disciplines and the cultures surrounding it. The dialectic between rhetoric and other disciplines (notably philosophy and psychology) illuminate evolving definitions of rhetoric, from myth and display to persuasion and symbolic inducement. Well-chosen, engaging examples demonstrate how rhetoric can find truths, particularly at times when science and reason fail to solve important human crises. Paramount to this well-wrought survey is Smith's ability to show that rhetorical criticism illustrates, verifies, and refines rhetorical theory. Thus, the synergistic relationship between theory and criticism in rhetoric is no different than in other arts. Chief among the Fourth Edition's enhancements are expanded discussions of the historical context for the creation of rhetorical theory and its use in public address; additional coverage of Isocrates, Cicero, Machiavelli, Kenneth Burke, and Michel Foucault; new material on the rhetoric of civil religion, ideological criticism, constitutive discourse, and feminist rhetorical theory; and many fresh examples. Each chapter ends with questions that sharpen readers' retention of concepts and the ability to apply those to everyday life.
