ilac international language academy of canada: Autoethnographies of Plurilingualism

Enrica Piccardo, Le Chen, 2024-09-30 This collection spotlights the authentic voices of plurilingual learners, bringing together autoethnographies of over twenty graduate students to deepen current understandings of lived experiences of plurilingualism. The volume begins with outlining foundational work on plurilingualism in language education up to this point, with the body of work on plurilingual subjectivities historically focusing on researchers' and practitioners' gazes, rather than students. The book moves into short autoethnographies of graduate students at the University of Toronto enrolled in a graduate education course over three years. Employing autoethnography as the primary methodology allows the space for privileging authentic voices of plurilingual learners in their own words, learners whose individual lived experiences are uniquely contextualized within the lens of plurilingual theory. The volume and diversity of perspectives showcased offer a unique window into the diversity and commonalities among plurilingual learners, offering opportunities for reflection on directions for future research. This book will be of interest to students and scholars in applied linguistics, language teaching and learning, and language education.

ilac international language academy of canada: *Reading for English International Standardized Tests* Dr. Nida Husna, M.Pd., M.A., TESOL., Prof. Didin Nuruddin Hidayat, M.A., TESOL, Ph.D., 2024-10-03 Reading is one the language skills and concurrently one of the basic subjects of the Department of English Education. This 12-credit subject is given in the first four semesters of the study program and is usually given by different lecturers in different semesters. Experiences have shown that one of the constraints faced by both lecturers and students in the teaching-learning process is the absence of the definitive teaching materials in the form of textbooks officially used in the program. As we all may know, the existence of designated textbooks is crucial to guarantee continuity of a program and proper gradation and selection of the teaching materials. This textbook of reading is compiled and composed to help both lecturers and students in the teaching-learning process so as to avoid them picking up any materials which are available but which may not be properly selected and graded. It is hoped that the textbook will serve its purpose.
