may you never steal lie or cheat irish: *Program Evaluation for Social Workers* Richard M. Grinnell, Peter Gabor (Sociologist), Yvonne A. Unrau, 2016 First published in 1994, this text is designed to be used by graduate-level social work students in courses on evaluation and program design. Over the course of 20 years and 6 editions, the goals of the book have remained the same: to prepare students to participate in evaluative activities within their organizations; to prepare students to become critical producers and consumers of professional evaluative literature; and to prepare students for more advanced evaluation courses and texts. Grinnell, Gabor, and Unrau aim to meet these objectives by presenting a unique approach that is realistic, practical, applied, and user-friendly. While a majority of textbooks focus on program-level evaluation, some recent books present case-level evaluation methods but rely on inferentially powerful -- but difficult-to-implement -- experimental baseline designs. This text assumes that neither of these approaches adequately reflects the realities of the field or the needs of students and beginning practitioners. Instead, *Program Evaluation for Social Workers* offers a blend of the two that demonstrates how they can complement one another. The integration of case-level and program-level approaches provides an accessible, adaptable, and realistic framework for students to more easily grasp and implement in the real-world.
