may god guide us to the right path: The World's Religions after September 11 Arvind Sharma, 2008-11-30 This set is an unprecedented examination of religion's influence on modern life, an honest assessment of how religion can either destroy us or preserve us, and a thorough exploration of what steps might be necessary for all religions to join together as a force for good. Convening on the fifth anniversary of the terrorist attack on the World Trade Center, the global congress The World's Religions after September 11 explored the negative and positive possibilities of the religious dimensions of life. The presentations from the congress have been pulled together in this set, which addresses religion's intersection with human rights, spirituality, science, healing, the media, international diplomacy, globalization, war and peace, and more. This comprehensive set includes contributions from such well-known scholars of religion as Arvind Sharma and a host of others from all the world's religious traditions. This set is an unprecedented examination of religion's influence on modern life, an honest assessment of how religion can either destroy us or preserve us, and a thorough exploration of what steps might be necessary for all religions to join together as a force for good. Because of the attack on the World Trade Center on September 11, 2001, the very concept of religion underwent a paradigm shift. Instead of standing for virtue and piety, peace and harmony, the word religion also came to be inextricably associated with evil, aggression, and terror. People around the world began to question whether the religious and secular dimensions of modern life can be reconciled, whether the different religions of the world can ever coexist in harmony. Indeed, the very future of religion itself has sometimes seemed to be uncertain, or at least suspect.

may god guide us to the right path: Corpus Juris of Islamic International Criminal Justice Farhad Malekian, 2018-09-30 This pioneering scholarly oeuvre evaluates the major comparative philosophy of Islamic international criminal justice. It represents an in-depth analysis of the necessities of creating an Islamic international criminal court, its possible jurisdiction, proceedings, judgments, and sanctions. It implies a court functioning under the legal personality of the International Criminal Court, with comparative international criminal lawyers with basic knowledge of Shariah contributing to the prevention of crimes and impunity at an international level. The morality and philosophy of Islamic justice are highly relevant with reference to the atrocities committed explicitly or implicitly under the pretext of Islamic rules by superiors, groups and

governments. The volume focuses on substantive criminal law and three methods of the criminal procedure, namely the inquisitorial, adversarial, and adquisitorial. The first two constitute the corpus juris of civil and common law systems. The third term presents a hybrid of the first two methods. The intention is to enhance the scope of each method of the criminal procedure comprehensively. The volume examines their variations and effects on a shared system of international criminal justice. The inherence of comparable norms in the foundation of Islamic and international criminal law affirms their efficiency in the implementation of the essence of the complementarity principle. This book will appeal to readers who are interested in comparative criminal law, international criminal justice, and Shariah criminal law. It is recommended for course literature.

may god guide us to the right path: Globalization and Educational Rights Joel Spring, 2014-04-08 This is the first book to explore the meaning of equality and freedom of education in a global context and their relationship to the universal right to education. It also proposes evaluating school systems according to their achievement of equality and freedom. Education in the 21st century is widely viewed as a necessary condition for the promotion of human welfare, and thus identified as a basic human right. Educational rights are included in many national constitutions written since the global spread of human rights ideas after World War II. But as a global idea, the meaning of educational rights varies between civilizations. In this book, which builds on the concept of the universal right to education set forth in Spring's *The Universal Right to Education: Justification, Definition, and Guidelines*, his intercivilizational analysis of educational rights focuses on four of the world's major civilizations: Confucian, Islamic, Western, and Hindu. Spring begins by

considering educational rights as part of the global flow of ideas and the global culture of schooling. He also considers the tension this generates within different civilizational traditions. Next, he proceeds to: *examine the meaning of educational rights in the Confucian tradition, in the recent history of China, and in the Chinese Constitution; *look at educational rights in the context of Islamic civilization and as presented in the constitutions of Islamic countries, including an analysis of the sharp contrast between the religious orientation of Islamic educational rights and those of China and the West; *explore the problems created by the Western natural rights tradition and the eventual acceptance of educational rights as represented in European constitutions, with a focus on the development and prominence given in the West to the relationship between schooling and equality of opportunity; and, *investigate the effect of global culture on India and the blend of Western and Hindu ideas in the Indian constitution, highlighting the obstacles to fulfillment of educational rights created by centuries of discrimination against women and lower castes. In his conclusion, Spring presents an educational rights statement based on his intercivilizational analysis and his examination of national constitutions. This statement is intended to serve as a model for the inclusion of educational rights in national constitutions.

may god guide us to the right path: Naphtalene Alia Mamdouh, 2013-08-31 Seen through the eyes of a strong-willed and perceptive young girl, *Naphtalene* beautifully captures the atmosphere of Baghdad in the 1940s and 1950s. Through her rich and lyrical descriptions, Alia Mamdouh vividly recreates a city of public steam baths, roadside butchers, and childhood games played in the same streets where political demonstrations against British colonialism are beginning to take place. At the heart of the novel is nine-year-old Huda, a girl whose fiery, defiant nature contrasts sharply with her own inherent powerlessness. Through Mamdouh's strikingly inventive use of language, Huda's stream-of-consciousness narrative expands to take in the life not only of a young girl and her family, but of her street, her neighborhood, and her country. Alia Mamdouh, winner of the Naguib Mahfouz Award in Arabic Literature, is a journalist, essayist and novelist living in exile in Paris. Long banned from publishing in Saddam Hussein's Iraq, she is the author of essays, short stories, and four novels, of which *Naphtalene* is the most widely acclaimed and translated.

Lucid, clearly written and argued, Keith M. Macdonald has written an essential primer on sociology and the professions. Keith M. Macdonald's work is richly nuanced, eminently comparative, and singularly suggestive--and thoroughly engrossing, to boot. It begins with the assertion that the currently regnant framework for dealing with professions is considerably less illuminating than that provided by scholars in the symbolic interactionist tradition, i.e., the 'collective mobility project' of the drive of occupations toward professional status. For Macdonald, this is 'the professional project' whose components he describes.

may god guide us to the right path: The Path Rev. Dr. Ebele Okonkwo Onuigbo, 2016-06-23 Decision-making is a fundamental aspect of our daily lives, shaping our paths through the resolutions we reach after careful consideration. From the simplest choices to the most complex dilemmas, individuals continuously navigate the terrain of decision-making throughout their lifetimes. These decisions serve as compass points, guiding us toward the fulfillment of our goals and aspirations, whether they lead to positive outcomes or negative consequences. How many

individuals truly take the time to thoroughly consider the available facts before diving into the decision-making process? Engaging in wise deliberation of facts prior to making a decision is crucial for ensuring that the resulting choice will have a meaningful impact, whether on the individual themselves or the circumstances at hand. So, how does one go about making a wise decision? It involves carefully weighing the available information, considering potential consequences, and evaluating the implications for both oneself and others in the surrounding community. Ultimately, the decisions we make not only shape our own lives but also have far-reaching effects on the well-being and experiences of those around us. In the modern world, we observe a striking dichotomy between Jesus' purpose-driven ethos and the prevalent self-centered pursuits that often consume individuals. Amidst the clamor for material possessions, societal status, and personal comfort, many seem to lose sight of life's deeper significance. While the pursuit of such desires is not inherently erroneous, an excessive fixation on them can obscure individuals from fulfilling their higher calling.

may god guide us to the right path: Islamic Democracy Farid Younos, 2020-09-28 Many scholars see democracy and Islam as incompatible. However, history has shown that Muslims were the pioneers of a democratic system 1400 years ago. This book illustrates the fact that Muslim nations can establish a democratic political system based upon Islamic teachings and principles. Democracy must be a homegrown political system that meets not only the political demands of a nation, but also the cultural demands. In order for a democracy to work in the nation it is being presented, it must align with the people's values and culture; simply being a worldwide political system is not enough. The time has come for Muslim nations to adopt a system that meets the demands of Muslims and non-Muslims alike for the sake of peace and justice for all. This is the theme of Islamic democracy that this book is attempting to portray for the Middle East.

Teaching is a field which synthesizes content and method for classroom application. All of the other major intellectual fields have a canon of works which practitioners can learn from and add to, but Teaching does not. The Connecting-the-Dots in World History: A Teacher's Literacy-Based Curriculum series changes this by showing how effective a teacher-generated curriculum can be. These books can inspire other teachers to create their own curriculums and inspire a change in the way that the public views teachers and teaching.

may god guide us to the right path: State and Religion Renae Barker, 2018-09-03 With its increasingly secular and religiously diverse population Australia faces many challenges in determining how the state and religion should interact. Australia is not unique in facing these challenges. States worldwide, including common law countries with shared legal and religious heritages, have also been faced with the question of how the state and religion should relate to one another. Countries such as the United Kingdom, Canada, New Zealand and the United States have all had to grapple with how to manage the state-religion relationship in the present day. This book provides a comprehensive historical review of the interaction of the state and religion in Australia. It brings together multiple examples of areas in which the state and religion interact, and reviews these examples across Australia's history from settlement through to present day. The book sets this story within a wider theoretical context via an examination of theories of state-religion relationships as well as a comparison with other similar common law jurisdictions. The book demonstrates how the solutions arrived at in Australia is uniquely Australian owing to Australia's unique legal system,

religious demographics and history. However this is just one possible outcome among many that have been tried in common law liberal democracies.
