Program Overview and Curriculum

The Mayo family medicine residency program offers a well-structured curriculum designed to equip residents with the skills and knowledge necessary to provide high-quality primary care across all age groups. The curriculum emphasizes a balanced approach that integrates outpatient and inpatient care, preventive medicine, chronic disease management, and care coordination. Residents are exposed to a broad spectrum of medical conditions, ensuring comprehensive training in family medicine principles.

Core Curriculum Components

The core curriculum includes didactic lectures, case conferences, and simulation training, focusing on clinical reasoning, diagnostic skills, and therapeutic interventions. Residents receive education in behavioral health, geriatrics, pediatrics, women's health, and emergency medicine, reflecting the diverse scope of family medicine practice. The program also prioritizes

interprofessional collaboration, encouraging teamwork with nursing, pharmacy, social work, and other healthcare professionals.

Emphasis on Patient-Centered Care

Patient-centered care is a foundational aspect of the residency curriculum. Residents learn to develop strong patient relationships, communicate effectively, and tailor treatment plans to individual preferences and cultural backgrounds. The program fosters skills in shared decision-making and health literacy to improve patient outcomes and satisfaction.

Clinical Training and Rotations

Clinical training is a cornerstone of the Mayo family medicine residency, providing residents with diverse hands-on experiences in multiple healthcare settings. The program's rotations are designed to expose residents to a wide array of clinical environments, preparing them for independent practice in both urban and rural communities.

Outpatient and Inpatient Experiences

Residents spend significant time in outpatient clinics, managing acute and chronic illnesses, performing routine health maintenance, and coordinating care. Inpatient rotations allow residents to develop skills in hospital medicine, including managing complex medical cases and collaborating with specialists. These experiences ensure residents are adept at transitioning care between settings.

Specialty Rotations

The residency includes specialty rotations in areas such as obstetrics, pediatrics, emergency medicine, psychiatry, and geriatrics. These rotations enhance residents' competence in managing a broad range of conditions and populations. Procedural training is integrated throughout clinical rotations, enabling residents to gain proficiency in essential skills like joint injections, skin biopsies, and basic obstetric procedures.

Community-Based Training

Community health is emphasized through rotations in underserved and rural areas. This exposure helps residents understand social determinants of health and develop strategies to address health disparities. Community-based training also includes participation in outreach programs and preventive health initiatives.

Faculty and Mentorship

The Mayo family medicine residency benefits from a distinguished faculty comprised of experienced clinicians, educators, and researchers dedicated to resident development. Faculty members provide personalized mentorship, fostering an environment conducive to professional growth and academic achievement.

Faculty Expertise

Faculty members have diverse backgrounds in family medicine subspecialties, including sports medicine, palliative care, and integrative medicine. Their expertise ensures residents receive comprehensive guidance tailored to their career interests. Faculty are actively involved in clinical practice, education, and research, serving as role models for lifelong learning.

Mentorship and Support

Residents are paired with faculty mentors who assist with career planning, research projects, and work-life balance. Regular feedback and evaluation sessions promote continuous improvement and skill development. The supportive mentorship structure helps residents navigate challenges and achieve their professional goals.

Research and Scholarly Activities

Research is an integral part of the Mayo family medicine residency, encouraging residents to engage in scholarly activities that advance primary care knowledge and practice. The program supports resident participation in quality improvement projects, clinical research, and educational scholarship.

Opportunities for Resident Research

Residents have access to Mayo Clinic's extensive research resources, including mentorship from experienced investigators and collaboration with interdisciplinary teams. Research topics often focus on population health, preventive care, and innovative treatment approaches. Projects culminate in presentations at conferences and publications in peer-reviewed journals.

Quality Improvement and Innovation

The residency promotes resident-led quality improvement initiatives aimed at enhancing patient care and healthcare delivery systems. Residents learn methodologies such as Plan-Do-Study-Act (PDSA) cycles and data analysis to

implement and evaluate changes effectively. This focus on innovation prepares residents to lead improvements in clinical practice settings.

Application Process and Requirements

The application process for the Mayo family medicine residency is competitive and requires a thorough understanding of program expectations and requirements. Prospective residents must demonstrate academic excellence, clinical aptitude, and alignment with the program's values.

Eligibility Criteria

Applicants must have graduated from an accredited medical school and completed the United States Medical Licensing Examination (USMLE) or Comprehensive Osteopathic Medical Licensing Examination (COMLEX) with satisfactory scores. International medical graduates must meet additional requirements including ECFMG certification.

Application Components

The application includes submission of a curriculum vitae, personal statement, letters of recommendation, and medical school transcripts. The personal statement should highlight the applicant's interest in family medicine and reasons for choosing Mayo Clinic. Letters of recommendation ideally come from faculty familiar with the applicant's clinical skills and character.

Interview and Selection

Selected applicants are invited for interviews to assess their communication skills, professionalism, and compatibility with the program culture. The selection committee evaluates candidates holistically, considering academic achievements, clinical experiences, and commitment to family medicine. Successful candidates demonstrate a passion for primary care and a dedication to lifelong learning.

- Graduated from accredited medical school
- Passed USMLE or COMLEX exams
- Submission of CV, personal statement, letters of recommendation
- Strong clinical skills and professionalism

- Alignment with Mayo Clinic's mission and values

mayo family medicine residency: Graduate Medical Education in Family Medicine Rick Kellerman, Gretchen Irwin, 2025-03-29 This book outlines the basic structure and processes of family medicine residency education programs. Family medicine residency programs are complex adaptive learning organizations that involve people, processes, procedures, buildings, budgets, high stakes, mistakes, mission statements, strategies, schedules, curricula, faculty, and residents. Residency program faculty are faced with many challenges, and this book gives them and others who are interested or involved in residency programs a clear and comprehensive breakdown of family medicine graduate medical education. The volume opens with detailed overviews of several family medicine organizations that support residency programs and faculty. Subsequent chapters cover a range of topics, including best practices in resident assessment and evaluation and best practices pertinent to the development of teaching and administrative skills for faculty. Furthermore, chapters explain necessary residency education accreditation requirements, which includes the understanding of the accreditation requirements, board certification requirements, Medicare graduate medical education funding policies, and Centers for Medicare and Medicaid Services (CMMS) billing regulations. All authors have been family medicine residency program directors or faculty or have been intimately involved in residency program education. Graduate Medical Education in Family Medicine offers residency program directors, faculty, and residency administrators a wide-ranging and comprehensive overview of family medicine residency education as well as specific administrative and educational best practices for residency education. This book will also be useful to those physicians with experience in their clinical field, but not in educational pedagogy and andragogy.

mayo family medicine residency: Family Medicine A.K. David, T.A.Jr. Johnson, D.M. Phillips, J.E. Scherger, Robert B. Taylor, 2013-06-29 Much is new in Family Medicine since the last edition of our textbook. For example, not only is the therapy of human immunodeficiency virus (HIV) disease and the acquired immunodeficiency syndrome (AIDS) much different than a few years ago; the epidemiology of the disease has also changed and more than half of the family physicians in a rural state such as Oregon have already managed patients with HIV disease or AIDS. 1 There are new immunization recommendations for children and new antibiotics for the treatment of bacterial infections. Computers are bringing medical informatics and on-line consultation into office practice. Medicare physician payment reform is underway and the reality of rationing medical care has been recognized. There has been a recent increase in student interest in a family practice career, 2 coincidental with a Council on Graduate Medical Education (COGME) recommendation that at least 50 percent of all residency graduates 3 should enter practice as generalists. Also there is increasing awareness of the need for a 4 Center for Family Practice and Primary Care at the National Institutes of Health. This all-new fourth edition is intended to present the scientific and practical basis of family medicine with special attention to what's new in family medicine. The emphasis is on how the physician provides continuing and comprehensive care for persons of all ages, with clinical content selected from the perspective of family physicians. The format of the book, like the practice of family medicine, continues to change.

mayo family medicine residency: Family Medicine John L. Buckingham, E.P. Donatelle, Thomas A. Jr. Johnson, Joseph E. Scherger, Robert B. Taylor, 2013-11-21 New material in a new format is contained in this third edition of Family Medicine. The comprehensive text nevertheless remains true to the goal of previous editions in offering a scientific approach to health and illness within the context of the family. Using up-to-date clinical material, the book demonstrates how the

family physician may provide comprehensive health care to persons of all ages. The first part of Family Medicine discusses such topics as the conceptual basis of family as discipline and specialty, problem differentiation, family-centered health care, longitudinal care, clinical reasoning, and resource management. The second part explores both problems related to organs and systems and problems related to the person, family and community, including: pregnancy, care of infants, children, adolescents, and the elderly; behavioral and psychiatric problems; emergency and critical care; sports medicine; alcoholism and substance misuse; environmental health; and neoplastic and infectious diseases. Family Medicine, with its greatly expanded in-depth coverage of the most commonly encountered clinical core problems and procedures in family medicine, continues to be a textbook written and edited by family physicians for family physicians.
