matt rife political affiliation: Right-Wing Extremism in Canada and the United States Barbara Perry, Jeff Gruenewald, Ryan Scrivens, 2022-06-29 This book is the first collection of scholarship featuring both Canadian and American scholarship on the resurgent right-wing extremist movement in the two countries. It is particularly timely given the recent rise in political populism that has engendered renewed activism from extreme right contingents. Trump's right-wing populist and white nationalist political campaign has galvanized Canadian and American white supremacist ideologies, identities, movements and practices. Leading Canadian and American scholars are brought together to explore a contemporary array of current dynamics, patterns and characteristics associated with the movement in each country. Split into four sections, it provides an introduction to extremism in the 21st century, it examines studying extremism, forms of extremist activity and violence, and the responses. The collection allows comparisons to be drawn out from the distinct treatments of each country. It speaks to students as well as scholars in social sciences departments, including criminology, sociology, social justice, and terrorism, peace and security studies, and political-violence related programs.

matt rife political affiliation: Paradigms, Poetics, and Politics of Conversion Jan N. Bremmer, Wout Jac. van Bekkum, Arie L. Molendijk, 2006 In the terms of Durheimian sociology, conversion is a fait social. Although they are rarely treated as a cultural phenomenon, conversions can obviously be examined for the norms, values and presuppositions of the cultures in which they take place. Thus conversion can help us to shed light on a particular culture. At the same time, the term evokes a dramatic appeal that suggests a kind of suddenness, although in most cases conversion implies a more gradual process of establishing and defining a new - religious - identity. From 21-24 May 2003, the University of Groningen hosted an international conference on 'Cultures of Conversion'. The contributions have been edited in two volumes, which pay special attention to the modes of language and idiom in conversion literature, the meaning and sense of religious-ideological discourse, the variety of rhetorical tropes, and the effects of the conversion narrative with allusions to religious or political conventions and idealizations. The present volume contains theoretical contributions on the

theory of conversion, with special attention to the rational choice theory, and on the history of research into conversion. It also offers stimulating case studies, ranging from the late Middle Ages to present times and taken from Germany, Great Britain and The Netherlands. The other volume, *Cultures of Conversion*, offers in-depth studies of conversion that are mainly taken from the history of India, Islam and Judaism, ranging from the Byzantine period to the new Muslims of the West.

matt rife political affiliation: *The Cayo Santiago Macaques* Richard G. Rawlins, Matt J. Kessler, 1986-09-15 This volume presents a broad spectrum of research on the Cayo Santiago macaques, a unique free-ranging colony of rhesus macaques in Puerto Rico. It includes thirteen scientific studies on the behavior and biology of the Cayo Santiago macaques, as well as a detailed history of the colony and a complete bibliography of over 260 scientific publications based on work at Cayo Santiago from 1938 through 1984. The chapters represent examples of both short- and long-term research conducted on the island over the past several years. Some are reviews, providing a synopsis of complex longitudinal studies of behavior, vocal communication, functional morphology, genetics, and population dynamics. Others document the results of opportunistic studies of behavior or biological surveys. The chapters cover a broad range of topics, but all share a common dependence on the detailed life history and genealogical data which make the Cayo Santiago macaque colony an important international research resource.

matt rife political affiliation: *Flows of Faith* Lenore Manderson, Wendy Smith, Matt Tomlinson, 2012-02-16 Unique local transformations of the practice of established religions in Asia and the Pacific are juxtaposed with the emergence of new religious movements whose incidence is growing across the region. In *Flows of Faith*, the contributing authors take as their starting point questions of how religions manifest outside their cultural boundaries and provide the basis for new social identities, political movements and social transformations. With fresh insights into the globalization of beliefs, their local inflections, and their institutionalization, the authors explore how old and new religions work in different settings, and how their reception and membership challenge orthodox understandings of religion and culture. The chapters - set in Asia, the Pacific, Australia, and the US - illustrate the contrasts and commonalities of these belief systems, and their allegiances and networks in the region and beyond. They include new religious movements - Falun Gong, Brahma Kumaris, the Hare Krishna movement, based in East and South Asia with outreach posts in Australia and the U.S. - and established 'old' religions - Christianity, Buddhism, Hinduism and Islam - that are revitalized and recreated in different settings and places. *Flows of Faith* describes the transnational reaches of faith. Religious practices and their local manifestations track the movement of peoples, through mission outreach, flight, migration, and pilgrimage. In each new setting, religions are shaped by and in turn shape political and cultural forces, proving that they are resilient and generative, originary and distinctive. The volume is a major contribution, providing readers with a fresh and creative approach into the living experience of religious communities in a contemporary globalised world.

matt rife political affiliation: *A House Divided* James A. Thomson, 2010 The American political climate has become increasingly polarized since the 1970s. Analysis by Keith Poole and Howard Rosenthal shows that voting patterns within Congress have become increasingly divided

along party lines, with fewer and fewer moderates. A major cause of polarization appears to be the geographic sorting of voters: Communities and regions of the country have become more politically and ideologically homogeneous, resulting in constituencies in congressional districts and in states that are more strongly conservative or liberal. Whatever its causes, the effects of increased polarization on political discourse and policymaking are clear: There is less room for deliberation between the two parties, and public policy decisionmaking is increasingly driven more by ideology than by objective analysis of which policies, programs, practices, and processes will produce the desired outcomes at the lowest cost. The mission of the RAND Corporation is to provide just this sort of objective analysis, and today's heated political environment presents a serious challenge to this mission. To help make sure that RAND's objective, nonpartisan research influences the policy debate, RAND must work to identify potentially controversial findings and take steps to ensure that they are not misinterpreted or distorted. -- back cover.
