Chahine, 2025-02-28 In South Africa, work-integrated learning (WIL) excursions are crucial in preparing university students for the world of work. As higher education institutions (HEIs) evolve to promote equity and inclusivity, these excursions are continuously refined to enhance student learning outcomes. This scholarly book explores how WIL excursions support self-directed learning (SDL) and foster skills essential for the 21st century, such as active learning, intercultural sensitivity, and epistemological access. A key focus is on the 2023 WIL excursions at North-West University (NWU), which align with South Africa's National Development Plan 2030 and the University Capacity Development Grant's (UCDG) goal of equipping graduates to address contemporary societal challenges. The book examines first-year excursions across three faculties – Education, Health Sciences, and Law – using both virtual and in-person experiences to develop intercultural citizenship, communication, and a sense of belonging. Through research-based insights, the chapters highlight how these excursions were designed and implemented to help students recognise personal biases, deepen cultural awareness, and take responsibility for their own learning. Additionally, the book underscores how students were encouraged to identify their learning needs and access resources that promote ongoing self-directed growth. By linking WIL to SDL, the book provides novel perspectives on fostering inclusivity and preparing students for their academic journeys, professional careers, and contributions to a more socially just world.

mcdonald s teacher august 2023: The School Voucher Illusion Kevin Welner, Gary Orfield, Luis A. Huerta, 2023 This authoritative book examines the long-standing campaign that resulted in today's school voucher policies. Advocates of private school vouchers promulgated a vision of service to low-income families, students of color, and other marginalized student populations. Vouchers were sold as a way to advance civil rights. But as voucher policies grew in size and became an element of Republican orthodoxy, they evolved into subsidies for a broad swath of advantaged families, with minimal antidiscrimination protections. The approach also transmuted into forms like education savings account programs and vouchers funded through tax-credited donations. In this book, scholars and national experts untangle this complex story to show how law and policy have aligned to dramatically alter the likely future of American schooling. They offer recommendations for modifying current policies with the goal of capturing more of the originally stated vision of voucher programs—equitable access to quality schooling, protection of all students' civil rights, and advancement of the wider societal goals of a democratic educational system. Book Features: Shows how a fast-growing policy is transforming education in the United States in ways that are very different from how that policy was sold to the public. Sets the stage with a discussion of the history and legal dimensions of voucher battles, as well as the politics of policy change. Examines the basic structure of contemporary private schooling, the Southern history of vouchers, and the key federal court decisions that have opened the door to an explosion of state legislation. Offers profiles of voucher policies in two states that have made the largest efforts to support vouchers, as well as the only nationally funded program in the nation's capital. Edited by three scholars with extensive experience in the study of school choice, with chapters by national experts who have produced seminal work in the field.

mcdonald s teacher august 2023: Unbeaching the Whale: Can Australia's Schooling Be Reformed? Dean Ashenden, 2024-03-03 Schools are livelier and more humane places than they were a generation or two ago. But many things are going badly in the basics of school life — in behaviour, discipline, school refusal, bullying, engagement, mental health, wellbeing — as well as in learning. Too many start behind, stay behind, and then leave early, unhappy and ill-equipped. The standing and morale of teachers are at a low ebb. Repeated attempts at reform large and small, local and national, haven't worked. The "education revolution" of the Rudd-Gillard years failed. And yet thinking and policy continue to be dominated by its language of "performance" and "accountability," its tests, MySchool, "national approach" and "school reform agreements" and its stunted view of what schools can be. *Unbeaching the Whale* offers a more generous way of thinking about schools. It insists that they can and should deliver twelve safe, happy and worthwhile years for everyone. It argues compellingly for a different kind of reform — of governance, of the sector system, and above all of the daily work of students and teachers. Pungent, sober, inspiring, urgent, *Unbeaching the Whale* is that rare thing, a book about schooling that is lucid, jargon-free, challenging and gripping. Dean Ashenden has worked in and around schools as a teacher, academic and consultant, and in journalism. He has contributed to all major print outlets and to many professional, academic and social affairs journals. His previous book, *Telling Tennant's Story*, was inaugural winner of the Australian Political Book of the Year Award. He is a Senior Honorary Fellow at the University of Melbourne.
