mcdonald s question and answer: The Process of Question Answering Wendy G. Lehnert, 2022-11-01 Originally published in 1978, The Process of Question Answering examines a phenomenon that relies on many realms of human cognition: language comprehension, memory retrieval, and language generation. Problems in computational question answering assume a new perspective when question answering is viewed as a problem in natural language processing. A theory of human question answering must necessarily entail a theory of human memory organization and theories of the cognitive processes that access and manipulate information in memory. This book describes question answering as a particular task in information processing. The theoretical models described here have been built on a formulation of general theories in natural language processing: theories about language that were developed without the specific problem of question answering in mind. By requiring programmers to be concerned with the precise form of information in memory, and the precise operations manipulating that information, they can uncover significant problems that would otherwise be overlooked. An early insight into artificial intelligence, today this reissue can be enjoyed in its historical context.

mcdonald s question and answer: Murder at McDonald's Phonse Jessome, 2016-06-28 The true story of the Sydney River McDonald's massacre, a botched robbery that would become the most sensational murder case in Canadian history. It started with a broken conveyor belt. When the mechanical malfunction brought eighteen-year-old McDonald's employee Derek Wood into the restaurant's back room, he saw the safe and got a dangerous idea. It would be so easy to prop the back door open, allowing two friends to sneak inside and steal the money. Wood assumed there was

at least \$200,000 in the cashbox—an incredible haul for just a few minutes' work—but things would not go according to plan. The robbery went wrong from the start, and within minutes, a fast-food restaurant in the wilds of Nova Scotia was turned into a bloodbath. Wood and his accomplices attacked the employees, killing three instantly and leaving the fourth for dead. In the safe, where they had expected to find a fortune, there was barely \$2,000. They fled the scene, instigating a manhunt that would captivate the nation. In the tradition of *In Cold Blood* and *The Onion Field*, this stunning work of true crime tells the story of the small-town murder that shocked a nation. Phonse Jessome brings a trained journalist's eye to the case, which remains one of the most horrifying incidents of suburban violence in recent history.

mcdonald s question and answer: Gastro-Postcolonialism Metaphysical Symbols in Brand Communication Oya AYAN, 2023-09-05 This thesis brings together three topics that we want to search: brand communication, gastronomy, metaphysics. After completing my master's degree in marketing communications, what I always had in mind was the new trends in advertising communication with the globalization of the 21st century. In the design of the advertisement, not only the use of elements in communication technologies, but also the philosophical background in its fabric attracted my attention. In this context, I began to sense that there might be mythological approaches in the chemistry of advertising messages that gained importance in social media. In the postmodern environment of the 21st century, food/nutrition, culinary arts and, to put it briefly, gastronomy became the dominant language of communication. Moreover, it caused kitchen wars by becoming politicized. In line with my interest in gastronomy, I wanted to focus on food advertisements. I started to ask myself to what extent the fast-food trend that marked the 21st century was changing the Global Society. Interestingly, I started to observe that there were metaphysical images that were reflected from ancient wisdom to the present day in McDonald's brand communication. This problem, which has not been studied much yet, was an important exercise for me in terms of analyzing the Global Society as a doctoral thesis. I can say that doing the analysis in the light of semiology as a method has broadened my horizon by directing me to an interdisciplinary perspective. I would like to acknowledge Communication Sciences and the Internet Institute, which allowed me to make such a significant study, Prof. Dr. Mete Çamdereli, who supported me with great excitement in all phases of my thesis, Prof. Dr. Emine Yavaşgel, who made great contributions to deepen my research subjects in the monitoring of the thesis. In addition, I would like to thank Prof. Dr. Mim Kemal Öke, from whose suggestions I benefited in the historical context. I am also indebted to my colleagues and friends, especially my family, who buoyed me up and supported me during the research and writing process of my thesis, which lasted more than 2 years. I hope this study will be useful and inspire new studies in this field.
