portrait society of america 2024: *The Case for Rural America* J. Tom Mueller, 2025-09-29 Rural America is at a crossroads: either it will manage to sustain itself long-term, or—as current trends suggest—it will continue to disappear through depopulation and urbanization. There have been calls for economic redevelopment, but even with these proposals, J. Tom Mueller argues that policymakers, politicians, and academics rarely make a clear case for why rural America matters and is worth saving in the first place. In this provocative book, Mueller meets these issues head-on by presenting a critique of conventional economic development efforts while also articulating why rural America is worthy of preservation. *The Case for Rural America* outlines the actions necessary to save our rural places and the people who live there. By suggesting approaches that would benefit urban populations as well as rural—such as establishing a universal basic income and implementing single-payer healthcare—Mueller offers a nuanced understanding of the complex needs of rural America while providing solutions that would benefit us all.

portrait society of america 2024: The Routledge Handbook of Endangered and Minority Languages Weixiao Wei, James Schnell, 2025-02-20 *The Routledge Handbook of Endangered and Minority Languages* addresses the urgent need for comprehensive language documentation and a deeper understanding of language identity, emphasizing the preservation of endangered languages. This book argues that safeguarding linguistic diversity enriches global cultural heritage and knowledge. By meticulously documenting minority languages, we not only preserve words and grammar but also the unique cultural narratives they carry. The book also introduces new language learning paradigms that recognize the complexities of multilingual societies, advocating for educational systems that embrace the diverse linguistic backgrounds of students. These approaches aim to create more inclusive and effective learning environments by valuing multilingualism. Exploring the fluid nature of language identity, the book examines how sociopolitical contexts and technology influence it, calling for policies that respect linguistic rights and promote social cohesion. It presents case studies from diverse regions, including the Pacific, Nordic countries, Cornwall, Pakistan, the UAE, and more, offering practical strategies for language preservation and revitalization. Groundbreaking insights into the use of digital tools, social media, and AI in language preservation, along with the challenges and successes of various revitalization efforts, make this book a valuable resource for researchers, educators, and policymakers committed to fostering linguistic diversity and equity worldwide.

portrait society of america 2024: William Alphonso Murrill: The Naturalist Ronald H. Petersen, 2025-08-20 For the casual naturalist, William Alphonso Murrill's name is associated with a plethora of new species of fungi, his mysterious resignation from the New York Botanical Garden, his disappearance from New York, and rediscovery as a free spirit in Florida. Pivotal were his years in New York City, of course, but the process through which he arrived there, the people who acted to shape him, and his activities while there, leading to his life-changing trauma, have not been previously adequately summarized. Three academic biologists were especially important to his development; George Francis Atkinson at Cornell, Lucien Marcus Underwood at Columbia, and Nathaniel Lord Britton at The New York Botanical Garden. Other individuals appeared omnipresent to the story: John Torrey, John Newberry, and Seth Low, the latter President of Columbia University and Mayor of New York City. The Torrey Botanical Club played an important role in Murrill's integration in the city and the spread of his name to the wider biology community. Edna, the love of

his life and his wife, remains a mysterious personage. The articulation of forces, individuals, and the times combined to produce an interesting man attempting to forge his own path as The Naturalist. Unlike most academics, Murrill left several autobiographical publications, often allegorical, which furnish material on his developing years. George Weber, who spent considerable time with Murrill in advanced life, penned a memorial from which valuable information has been gathered, and Jim Kimbrough (2003), Murrill's successor as mycologist at the University of Florida, wrote a more informal sketch of Murrill's last years. This book serves as a comprehensive biography of William Alphonso Murrill's fascinating and mysterious life & career.

portrait society of america 2024: *A View of Venice* Kristin Love Huffman, 2023-12-05 Jacopo de' Barbari's *View of Venice*, a woodcut first printed in the year 1500, presents a bird's-eye portrait of Venice at its peak as an international hub of trade, art, and culture. An artistic and cartographic masterpiece of the Renaissance, the *View* depicts Venice as a vibrant, waterborne city interconnected by canals and bridges and filled with ornate buildings, elaborate gardens, and seafaring vessels. The contributors to *A View of Venice: Portrait of a Renaissance City* draw on a high-resolution digital scan of the over nine-foot-wide composite print to examine the complexities of this extraordinary woodcut and portrayal of early modern Venetian life. The essays show how the *View* constitutes an advanced material artifact of artistic, humanist, and scientific culture. They also outline the ways the print reveals information about the city's economic and military power, religious and social infrastructures, and cosmopolitan residents. Featuring methodological advancements in the digital humanities, *A View of Venice* highlights the reality and myths of a topographically unique, mystical city and its place in the world. portrait society of america 2024: *Dismantling the Racism Machine* Karen Gaffney, 2025-04-18 This significantly updated second edition serves students and general readers alike who seek to learn what is often not taught, a basic history of race and racism in the US. If we are to dismantle systemic racism and create a more just society, people need a place to begin. This accessible, introductory, and interdisciplinary guide can be one such place. Grounded in critical race theory, this book uses the metaphor of the Racism Machine to highlight that race is a social construct and that racism is a system of oppression based on invented racial categories. It debunks the false ideologies that race is biological, that race has always existed, that systemic racism is over, and that anti-White racism is real. As a manual, this book presents clear instructions for understanding the history of race and how a small elite created a racial hierarchy to protect their power through a divide-and-conquer strategy that lives on today. As a toolbox, this book provides a

variety of specific action steps that readers can take to address racism in a post-civil rights era where extremists have weaponized the study of race and racism.

portrait society of america 2024: *Major General Thomas Mifflin* Robert Ernest Hubbard, 2025-04-20 Alongside the Founding Fathers who are household names, numerous lesser known founders were also instrumental in the establishment of the United States of America. This book presents the comprehensive biography of one such neglected man, Pennsylvania's Thomas Mifflin. With the sole exception of George Washington, Thomas Mifflin was the only founder to rise to both the highest military rank in the American army—major general—as well as the highest position in the new nation's civilian government—President of the Continental Congress. George Washington's first military aide and the first Quartermaster General of the Continental Army, Mifflin signed both the U.S. constitution and the peace treaty with Great Britain, which ended the Revolutionary War. He was elected the first governor of Pennsylvania and re-elected twice by landslide margins. Drawing on all available primary sources and a wealth of secondary sources, this exhaustively researched biography presents the life, accomplishments and legacy of an influential, Founding Father too often overlooked in recent times.

portrait society of america 2024: *International Perspectives on Family Caregiving* Selwyn Stanley, 2025-04-30 Meeting the need for a text for the academic community which recognises informal caregiving experiences, this is compelling reading for scholars of social work, health and social care, medical sociology, nursing, psychology, and counselling and allied disciplines.
