practice dog adopt me: The Dingo Debate Bradley Smith, 2015-08-03 The Dingo Debate explores the intriguing and relatively unknown story of Australia's most controversial animal – the dingo. Throughout its existence, the dingo has been shaped by its interactions with human societies. With this as a central theme, the book traces the story of the dingo from its beginnings as a semi-domesticated wild dog in South-east Asia, to its current status as a wild Australian native animal under threat of extinction. It describes how dingoes made their way to Australia, their subsequent relationship with Indigenous Australians, their successful adaption to the Australian landscape and their constant battle against the agricultural industry. During these events, the dingo has demonstrated an unparalleled intelligence and adaptable nature seen in few species. The book concludes with a discussion of what the future of the dingo in Australia might look like, what we can learn from our past relationship with dingoes and how this can help to allow a peaceful co-existence. The Dingo Debate reveals the real dingo beneath the popular stereotypes, providing an account of the dingo's behaviour, ecology, impacts and management according to scientific and scholarly evidence rather than hearsay. This book will appeal to anyone with an interest in Australian natural history, wild canids, and the relationship between humans and carnivores.

practice dog adopt me: Animal Ethos Lesley A. Sharp, 2018-12-04 What kinds of moral challenges arise from encounters between species in laboratory science? Animal Ethos draws on ethnographic engagement with academic labs in which experimental research involving nonhuman species provokes difficult questions involving life and death, scientific progress, and other competing quandaries. Whereas much has been written on core bioethical values that inform regulated behavior in labs, Lesley A. Sharp reveals the importance of attending to lab personnel's quotidian and unscripted responses to animals. Animal Ethos exposes the rich—yet poorly understood—moral dimensions of daily lab life, where serendipitous, creative, and unorthodox responses are evidence of concerted efforts by researchers, animal technicians, veterinarians, and animal activists to transform animal laboratories into moral scientific worlds.

practice dog adopt me: Resourcing Mission Helen Cameron, 2013-01-03 There is a lively

debate about the mission of the local church and an interest in doing new things or doing things differently. However, when church leaders start to work out the implications of change, they immediately come across real issues such as the time, money and buildings needed and how to make decisions that will change things, yet keep most people on board. Resourcing Mission offers the missing link between missiological thinking and the practical theological thinking about the task of mobilising local churches. Helen Cameron discusses questions such as the use of available time and money, different models of income, different models of leadership, the use of buildings, changing patterns of risk and regulation and approaches to decision making. Resourcing Mission shows how practical theology and mission and ministry need to work together and draw on each other's resources to strengthen the work of the church.
