Monetary and Capital Markets Department, International Monetary Fund. Strategy, Policy, & Review Department, International Monetary Fund. Research Dept., 2019-06-10 This paper reviews the Fund's policy on multiple currency practices (MCPs). There remain strong economic and legal reasons to retain a policy on MCPs. The over-arching aim of the review is to make the policy and its application more effective. Based on this review, the paper proposes initial considerations for reforming features of the policy that have created challenges. • Clarifying the concept of "official action" to focus on measures that segment FX markets. • Eliminating potentiality. • Updating the threshold for permissible FX spreads. • Adjusting approval policies. • Reviewing links with capital transactions. • Considering merits of a remedial framework.

practice forward thomson reuters: The Flexibility Paradigm Manar Sweillam Morales, 2025 The postpandemic return to the office movement has thrown organizations, their employees, and their clients into a tailspin. Forced to allow remote working during the onset of COVID-19, with no planning, organizations had a mixed experience. Some made the transition to hybrid workplaces with great success, but others perceived only what they had lost with the move to remote work. Manar Morales, the CEO and founder of the Diversity and Flexibility Alliance, a think-tank for professional services organizations, wrote *The Flexibility Shift* to show leaders that flexibility has a strong business case: it drives productivity, talent, diversity, engagement, sustainability, and ultimately profitability. Yet organizations need more than a policy. Policies won't bring people back; experiences will. To create the return on experience (ROE) required to make flexibility work, they need a shift in perspective to see flexibility as a way to strengthen their organization. *The Flexibility Shift* provides the paradigm shift, strategy, and framework for professional services firms and other

organizations to create not just a policy but an entire culture that allows their organization to build on their strengths and lead the future of work--

practice forward thomson reuters: Learner-Centered Instructional Design and Evaluation Rasha AlOkaily, 2023-04-28 Learner-Centered Instructional Design and Evaluation offers a forward-thinking, evidence-based vision of technology-enhanced higher education that taps into today's digital access opportunities for more dynamic, agnostic, and inclusive learning experiences. The recent ubiquity of digital devices has fostered a new generation of learners who are technologically adept, engage in rapid social co-construction of knowledge, and expect increased choice and personalisation of educational content and environment. Colleges and universities, however, continue to apply their technology tools into outdated, passive pedagogies. Based on theory and empirical research, this book's innovative framework guides scholars and practitioners toward instructional design and evaluation approaches that leverage the anytime-anywhere potential of wireless networked devices to foster flexible learning experiences and device-neutral

assignments. Each chapter is rich with designs, deliveries, and evaluations of lesson plans, projects, and other real-world course works exemplifying the procedures and principles that will rejuvenate learning amid the globalisation, commodification, and massification of higher education.

Nwogugu, 2019-03-09 Indices, index funds and ETFs are grossly inaccurate and inefficient and affect more than €120 trillion worth of securities, debts and commodities worldwide. This book analyzes the mathematical/statistical biases, misrepresentations, recursiveness, nonlinear risk and homomorphisms inherent in equity, debt, risk-adjusted, options-based, CDS and commodity indices – and by extension, associated index funds and ETFs. The book characterizes the “Popular-Index Ecosystems,” a phenomenon that provides artificial price-support for financial instruments, and can cause systemic risk, financial instability, earnings management and inflation. The book explains why indices and strategic alliances invalidate Third-Generation Prospect Theory (PT3), related approaches and most theories of Intertemporal Asset Pricing. This book introduces three new decision models, and some new types of indices that are more efficient than existing stock/bond indices. The book explains why the Mean-Variance framework, the Put-Call Parity theorem, ICAPM/CAPM, the Sharpe Ratio, Treynor Ratio, Jensen’s Alpha, the Information Ratio, and DEA-Based Performance Measures are wrong. Leveraged/inverse ETFs and synthetic ETFs are misleading and inaccurate and non-legislative methods that reduce index arbitrage and ETF arbitrage are introduced.

practice forward thomson reuters: *Insurance in European VAT* Marta Papis-Almansa, 2016-11-30 Insurance constitutes a significant part of the financial services sector and is one of the foundations of modern economy and society. In the design of tax laws, however, whether and how to tax insurance is a complex issue that has become particularly controversial in the area of value-added tax (VAT). In the European Union, as in most of the world, insurance is exempt from VAT, but New Zealand and Australia do not follow this practice. Given that New Zealand’s simple, comprehensive goods and services tax (GST) – called ‘the world’s purest value-added tax’ – and its modified Australian version do not appear to suffer from the shortcomings in efficiency and effectiveness that plague European VAT, a comparison of the two systems is in order. This book is not only the first comparative in-depth study of the treatment of insurance in the two systems, but also the first comprehensive legal research devoted to the treatment of insurance in EU VAT published in English. Among the underlying issues and topics treated by the two systems covered are the following: – who has a right to deduct input VAT in relation to supplies inherent in insurance arrangements and to what extent; – what constitutes a supply of insurance and consideration for such a supply; – what transactions fall within the scope of the VAT Directive’s exemption for insurance; and – drawing a line between insurance and saving. The analysis is grounded in a methodology in which concepts of European VAT are compared with concepts performing the same function in the Australian and New Zealand GST laws. The author concludes with proposals for reform in EU VAT in the light of experience in these two major non-EU countries. Given that it has been proven that exemptions from VAT (such as insurance) cause a significant number of economic distortions and inefficiencies, this study represents a major contribution to a topical debate in European VAT law. It will be welcomed by taxation authorities, interested policymakers,

practitioners, and scholars not only in Europe but worldwide.

practice forward thomson reuters: Towards Reforming the Legal Framework for Secured Transactions in Nigeria Chima Williams Iheme, 2016-08-16 This book offers a valuable guide to one of the most challenging areas of commercial law, now frequently referred to as secured transactions, with a focus on Nigerian, Canadian and United States perspectives. A debtor's ability to provide collateral influences not only the cost of the money borrowed, but also in many cases, whether secured lenders are willing to offer credit at all. The book proposes that increasing access to, and indeed, lowering the cost of credit could tremendously boost economic development, while at the same time arguing that this would best be achieved if the legal framework for secured transactions in Nigeria, and of course, any other country with similar experiences, were designed to allow the use of personal property and fixtures to secure credit. Similarly, the creation, priority, perfection, and enforcement of security interests in personal property should be simplified and supported by a framework that ensures that neither the interests of secured lenders nor debtors are hampered, so as to guarantee the continuous availability of affordable credit as well as debtors' willingness to borrow and do business. The book further argues that in addition to the obvious preference for real property over personal property by secured lenders due to the unreformed secured-transactions legal framework in Nigeria, its compartmentalized nature has also resulted in unpredictability in commerce and the concomitant effects of poor access to credit. Through the comparative research conducted in this book utilizing the UCC Article 9 and Ontario PPSA as benchmarks, the author provides reformers with a repository of tested secured-transactions law solutions, which law reformers in the Commonwealth countries in Africa and beyond, as well as the business community will find valuable in dealing with issues that stem from secured transactions.

practice forward thomson reuters: Virtues and Fallacies of VAT: An Evaluation after 50 Years Robert F. van Brederode, 2021-08-09 Value-added tax (VAT) is a mainstay of revenue systems in more than 160 countries. Because consumption is a more stable revenue base than other tax bases, VAT is less distorting and hence more likely to encourage investment, savings, optimum labor supply decisions, and growth. VAT is not without criticism however, and faces its own specific technical and policy challenges. This book, the first to thoroughly evaluate VAT from a global policy perspective after over 50 years of experience with its intricacies, offers authoritative perspectives on VAT's full spectrum—from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality. The contributors—leading tax practitioners and academics—examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book, including: revenue generation and revenue efficiency; single rate versus multiple rates; susceptibility to fraud; exemptions and exceptions; compliance cost for businesses; policy and compliance gaps in revenue collection; adjustment rules caused by the transactional nature of the tax; transfer pricing issues; treatment of vouchers; permanent establishments and holding companies; payment of refunds; cross-border digital transactions; and supplies for free or below cost price. The second part offers six country reports—on New Zealand, Japan, China, Colombia, Ethiopia, and India—to demonstrate the different ways in which VAT operates in a variety of national economies. Whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one, it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and causes minimal distortions. This invaluable book serves as an expert guide to VAT policy development in this area. It will be welcomed not only by concerned government officials but also by tax professionals (both lawyers and accountants) and academics in tax law.

practice forward thomson reuters: Fighting Fraud and Corruption in the Humanitarian and Global Development Sector Oliver May, 2016-05-12 There are an estimated 40,000 international Non-Government Organisations (NGOs), working in an enormous global aid industry; official development assistance alone reached £90bn in 2014. This is supplemented by huge voluntary giving – the UK public, for example, give around £1bn a year to overseas causes. These organisations face a unique challenge from fraud and corruption. Operating in the world's most under-developed and fragile environments, with minimal infrastructure and trust-based cultures, the risk is high. And, being wholly reliant on donors and supporters for income, so are the stakes. Researchers make different estimates of the scale of the problem facing the sector. Some research implies that losses to the global aid budget caused by occupational fraud and abuse may be in the billions of pounds, while those to the British public's voluntary overseas donations could be in the tens of millions. For many sector professionals working in the developing world, these estimates are readily believable. Fighting Fraud and Corruption in the Humanitarian and Global Development Sector by Oliver May is a timely, accessible and relevant how-to guide, which explores the scale and

nature of the threat, debunks pervasive myths, and shows readers how to help their NGOs to better deter, prevent, detect and respond to fraud and corruption.

practice forward thomson reuters: English for Research Publication Purposes Karen Englander, James Corcoran, 2019-02-21 Scholars who use English as an additional language confront challenges when disseminating their research in the global market of knowledge production dominated by English. English for Research Publication Purposes analyses the experiences and practices of these scholars across the globe and presents critical plurilingual pedagogies as a theoretically and empirically informed means of supporting them. This book: • Draws on an empirical study of a Latin American university's effort to mount a course that provides support to emerging and established scholars who use English as an additional language; • Brings theoretically informed discussions of critical pedagogies, plurilingualism and identity affirmation to better serve plurilingual scholars who seek to publish their research in English-language journals; • Provides examples of classroom activities that can be adapted and adopted to local contexts and realities in a curriculum based on critical plurilingual pedagogies; • Proposes future directions for research into the internationally urgent, growing concerns of global scholars who produce English-medium academic knowledge for the world stage. Incisive and cutting-edge, English for Research Publication Purposes will be key reading for academics and upper-level students working in the areas of ESP, EAP, ERPP, and Applied Linguistics.

practice forward thomson reuters: Routledge Handbook on Consumption Margit Keller, Bente Halkier, Terhi-Anna Wilska, Monica Truninger, 2017-02-10 Consumption research is burgeoning across a wide range of disciplines. The Routledge Handbook on Consumption gathers experts from around the world to provide a nuanced overview of the latest scholarship in this expanding field. At once ambitious and timely, the volume provides an ideal map for those looking to position their work, find new analytic insights and identify research gaps. With an intuitive thematic structure and resolutely international outlook, it engages with theory and methodology; markets and businesses; policies, politics and the state; and culture and everyday life. It will be essential reading for students and scholars across the social and economic sciences.
