practice makes perfect age rating: *Working Memory and Ageing* Robert H. Logie, Robin G. Morris, 2014-06-20 The rapid growth in the numbers of older people worldwide has led to an equally rapid growth in research on the changes across age in cognitive function, including the processes of moment to moment cognition known as working memory. This book brings together international research leaders who address major questions about how age affects working memory: Why is working memory function much better preserved in some people than others? In all healthy adults, which aspects of working memory are retained in later years and which aspects start declining in early adulthood? Can cognitive training help slow cognitive decline with age? How are changes in brain structures, connectivity and activation patterns related to important changes in working memory function? Impairments of cognition, and particularly of working memory, can be major barriers to independent living. The chapters of this book dispel some popular myths about cognitive ageing, while presenting the state of the science on how and why working memory functions as it does throughout the adult lifespan. *Working Memory and Aging* is the first volume to provide an overview of the burgeoning literature on changes in working memory function across healthy and pathological ageing, and it will be of great interest to advanced undergraduates, postgraduates and researchers in psychology and related subject areas concerned with the effects of human ageing, including several areas of medicine.

practice makes perfect age rating: *The Golden Age of Pinehurst* Lee Pace, 2012-11-15 One of the finest golf courses in America in the early 1900s was the revered Pinehurst No. 2, designed by the legendary Donald Ross and first opened in 1907. Physically and mentally demanding, the course gave players options on every hole and required them to envision and execute recovery shots from the sandy perimeters and the pine forests as well as think creatively around the intricate greens. As a result, No. 2 became a favorite of the nation's top amateurs and professionals. Unfortunately, a modernization of the course over the last four decades stripped it of much of its character. In *The Golden Age of Pinehurst*, Lee Pace chronicles the breathtaking restoration of No. 2 from its recent slick and monochromatic presentation back to a natural potpourri of hardpan sand, wire grass, and Sandhills pine needles. The restored No. 2--accessible for amateur play, yet challenging enough for the professional--once again stands apart for its beauty, strategic appeal, and Old World flavor.
