synonym for good communication: Emotional Prosody Processing for Non-Native English Speakers Halszka Bąk, 2016-09-02 This volume provides the first systematic and data-driven exploration of English emotional prosody processing in the minds of non-native speakers of the language. Over the past few decades emotional prosody has attracted the interest of researchers from a variety of disciplines such as psychiatry, neuropsychology, psycholinguistics, and linguistics. Although a considerable collective body of empirical evidence exists regarding emotional prosody processing in native speakers of various languages, non-native speakers have been virtually ignored. This constitutes a knowledge gap of increasing relevance, as we approach 2050, the year when the global population of non-native speakers of English is estimated to overtake that of native speakers of the language. This volume aims to fill this gap and provide insights into how emotions are processed on multiple levels while also presenting novel methodological solutions. Crucially, Emotional Prosody Processing for Non-Native English Speakers: Towards an Integrative Emotion Paradigm begins by providing a conceptual background of emotion research, and then demonstrates a novel, workable, completely integrative paradigm for emotion research. This integrative approach

reconciles theories such as the dimensional view of emotions, the standard basic emotions view, and the appraisal view of emotions. Following this theoretical section is an empirical exploration of the topic: the volume explores those views via experimental tasks. The insight into overall processing such a multiple-level approach allows a comprehensive answer to the question of how non native speakers of English process emotional prosody in their second language. By offering a critical, data-driven, integrative approach to investigating emotions in the minds of non-native English speakers, this volume is a significant and timely contribution to the literature on emotion prosody processing, bilingual research, and broadly understood emotion research.
