sylva family practice pa: The Child's World of Illness Simon R. Wilkinson, 2006-11-02 How do I decide I am ill; how do I decide that my children are ill? How do I learn effective ways of conveying to others that I am ill? This book discusses the languages of illness which we use to present our discomforts to others through an exploration of the child's world of illness. It looks at how illness concepts are introduced to children, how the causes of illness and 'germ' rationales are incorporated into the socialisation of children, and how a particular morality about health and illness is expressed. Besides the analysis of the social context within which the children's views are developing, the book presents the children's own views from three years old up to thirteen. How we talk about illness can have as important consequences as the methods we use to cure it. This book

persuades the reader to look more closely at the language of illness, allowing a reappraisal to medical practice, school health programmes and class teaching, health education and even the differences in health between the social classes. In this way it forges a link between physical medicine and psychotherapy, providing the developmental perspective of illness behaviour which has long been lacking.

sylva family practice pa: Exploring and Celebrating the Early Childhood Practitioner Carla Solvason, Rebecca Webb, 2022-11-01 This exciting new book celebrates, interrogates and re-imagines the complex and demanding role of the Early Childhood Practitioner. Exploring the many different facets of the Early Childhood Practitioner's (ECP) role, it challenges normative constructions of practitioners and how they have been shaped by assumptions of history, culture and policy. Drawing on a range of theoretical presumptions and debates, the chapters champion the multidimensional power and potentiality of the ECP, arguing for greater respect and recognition for a role that supports and enables at a crucial time in a child's life. With opportunities for reflection, key topics include: The specialist pedagogical expertise of the ECP The key role that ECPs play in the child's holistic wellbeing The ECP as diplomat across many professional contexts, effectively communicating with families and professionals The creative ECP, pushing traditional, normative boundaries of practice The ECP as so much more than they are customarily perceived as being. This latest addition to the TACTYC series will be valuable reading for Early Years students - particularly on Masters level courses - as well as those working and researching in the Early Years sector.

sylva family practice pa: **Psychoactive Herbs in Veterinary Behavior Medicine** Stefanie Schwartz, 2008-01-09 The phenomenal growth of public interest in alternatives to Western treatments for human disease has spilled over into veterinary medicine. Many holistic veterinarians and pet owners are now interested in using alternative remedies to solve health problems with their pets. Psychoactive Herbs in Veterinary Behavior Medicine is the first text on psychoactive herbal remedies for the treatment of behavior problems in small animals. Psychoactive Herbs in Veterinary Behavior Medicine is an important guide for board-certified veterinary behaviorists, as well as veterinarians and veterinary students with a particular interest in behavior medicine. In addition, pet owners interested in alternative medicine for their misbehaving pets can use this well-rounded work to make informed decisions on the use of over-the-counter remedies.

sylva family practice pa: *The Bloomsbury Handbook of Early Childhood Transitions Research* Aline-Wendy Dunlop, Sally Peters, Sharon Lynn Kagan, 2024-09-19 Research into early childhood transitions has become a field in its own right. It is increasingly understood that a positive start in any new setting can influence the child's engagement, sense of belonging, well-being, progression in learning, and agency, and may be dependent on the insight of educators and families, and yet there is no research methodology or research methods book dedicated to this growing field of study.

Including 27 chapters written by researchers from the UK, New Zealand, the USA, Sweden, Iceland, Australia and Canada this handbook presents an overview of the field exploring its current debates, reflects on its history, and offers suggestions for the future of the field. This book is an essential reference point for anyone studying or undertaking research into transitions in early childhood.

sylva family practice pa: Health and Wellbeing in Childhood Susanne Garvis, Donna Pendergast, 2024-03-04 Health and Wellbeing in Childhood provides a fundamental introduction for educators in key priority areas of health and wellbeing education, including physical education, promoting health in childhood, and strengthening social and emotional learning in young children. It approaches each topic with childhood diversity and complexity in mind. The fourth edition has been comprehensively updated and continues to explore relevant standards and policies, including the revised Early Years Learning Framework. It includes a new chapter on executive functions in early childhood, focusing on the development of higher-order skills required for children to engage in purposeful and goal-directed behaviours. Each chapter features case studies that exemplify practice; spotlight boxes that provide further information on key concepts; and pause and reflect activities, end-of-chapter questions and learning extensions that encourage readers to consolidate their knowledge and further their learning.
