syracuse university political science: Me Too Political Science Nadia Brown, 2020-06-09 Me Too Political Science explores the multiple manifestations and implications of gendered biases in Political Science by connecting the dots between the sexual harassment described in the recent report on 2017 American Political Science Association's Survey on Sexual Harassment at Annual Meetings and other problematic issues. Started by Tarana Burke in 2007 to stand with young women of color who survived sexual assault, the MeToo campaign was intended to let women know that they were not alone. In turn, the Women's Caucus for Political Science used #MeTooPoliSci to bring awareness to sexual harassment, assault and misconduct in the discipline. The essays in this book and the authors' scholarly activism, harnessed a collective power to dispel the shame, embarrassment and secrecy that surrounds these issues. They focus in particular on bullying, entitled and toxic forms of masculinity; systematic discounting of and dismissiveness and derision toward work on gender and sexuality; biases and inequities associated with hiring, teaching evaluations, service loads, and tenure and promotion; and related and often intersecting forms of harassment but not only those related to race and sexuality. The essays in this volume stem from the 2018 pre-conference held by the Women's Caucus for Political Science at the American Political Science Association's annual meeting. Me Too Political Science is of great importance not only to scholars interested in Gender and Women's Studies, but all those working in the Political Science discipline - and even beyond, to academia as a whole. The chapters were originally published as a special issue of the Journal of Women, Politics and Policy.

Reality is far more complex. The authors capture and explain this complexity through a collection of chapters by leading scholars of a range of voting gaps, including racial/ethnic gaps, the marriage gap, the worship attendance gap, the income/class gap, the rural/urban gap, the gender gap, and the generation gap. Also included is a chapter by a leading political pollster and strategist, Anna Greenberg, on how campaigns use information about voting gaps.

syracuse university political science: Losers' Consent Christopher Anderson, 2005-01-13 Democratic elections are designed to create unequal outcomes: for some to win, others have to lose. This book examines the consequences of this inequality for the legitimacy of democratic political institutions and systems. Using survey data collected in democracies around the globe, the authors argue that losing generates ambivalent attitudes towards political authorities. Because the efficacy and ultimately the survival of democratic regimes can be seriously threatened if the losers do not consent to their loss, the central themes of this book focus on losing: how losers respond to their loss and how institutions shape losing. While there tends to be a gap in support for the political system between winners and losers, it is not ubiquitous. The book paints a picture of losers' consent that portrays losers as political actors whose experience and whose incentives to accept defeat are shaped both by who they are as individuals as well as the political environment in which loss is given meaning. Given that the winner-loser gap in legitimacy is a persistent feature of democratic politics, the findings presented in this book contain crucial implications for our understanding of the functioning and stability of democracies.
