IMPORTANCE OF A TABLE FOR LITERATURE REVIEW

A TABLE FOR LITERATURE REVIEW PLAYS A PIVOTAL ROLE IN SYSTEMATIZING THE LARGE VOLUME OF INFORMATION GATHERED DURING THE RESEARCH PROCESS. IT ALLOWS RESEARCHERS TO CONDENSE EXTENSIVE DATA INTO A CONCISE FORMAT, FACILITATING EASIER COMPARISON AND CONTRAST OF STUDIES. THIS ORGANIZATION AIDS IN IDENTIFYING PATTERNS, THEMES, AND RESEARCH GAPS THAT MIGHT NOT BE IMMEDIATELY APPARENT THROUGH NARRATIVE TEXT ALONE. MOREOVER, TABLES CONTRIBUTE TO ENHANCING THE READABILITY AND PROFESSIONALISM OF ACADEMIC PAPERS BY PROVIDING A CLEAR SNAPSHOT OF THE REVIEWED LITERATURE.

BENEFITS OF USING TABLES

TABLES OFFER SEVERAL ADVANTAGES WHEN INCORPORATED INTO LITERATURE REVIEWS. THEY STREAMLINE INFORMATION PRESENTATION, ENABLE QUICK REFERENCE TO CRITICAL STUDY DETAILS, AND SUPPORT THE SYNTHESIS OF FINDINGS ACROSS MULTIPLE SOURCES. FURTHERMORE, TABLES HELP TO:

- HIGHLIGHT KEY VARIABLES AND OUTCOMES ACROSS STUDIES
- CLARIFY METHODOLOGICAL DIFFERENCES AND SIMILARITIES
- ORGANIZE LITERATURE CHRONOLOGICALLY OR THEMATICALLY
- FACILITATE CRITICAL ANALYSIS AND EVALUATION OF SOURCES
- REDUCE REDUNDANCY BY SUMMARIZING LENGTHY DESCRIPTIONS

Key Components of an Effective Literature Review Table

CREATING A SUCCESSFUL TABLE FOR LITERATURE REVIEW REQUIRES CAREFUL CONSIDERATION OF THE COMPONENTS INCLUDED. THE TABLE SHOULD CAPTURE ESSENTIAL INFORMATION WHILE MAINTAINING CLARITY AND BREVITY. SELECTING RELEVANT CATEGORIES DEPENDS ON THE RESEARCH TOPIC AND OBJECTIVES, BUT CERTAIN ELEMENTS ARE UNIVERSALLY IMPORTANT FOR COMPREHENSIVE LITERATURE SYNTHESIS.

Essential Elements to Include

TO MAXIMIZE THE UTILITY OF A LITERATURE REVIEW TABLE, THE FOLLOWING COMPONENTS ARE OFTEN INCORPORATED:

- **AUTHOR(S) AND YEAR:** IDENTIFIES THE SOURCE AND PUBLICATION DATE FOR EASY CITATION.
- **STUDY TITLE OR TOPIC:** PROVIDES A CONCISE DESCRIPTION OF THE RESEARCH FOCUS.
- **RESEARCH OBJECTIVES OR QUESTIONS:** CLARIFIES THE PURPOSE OF THE STUDY.
- **METHODOLOGY:** DETAILS THE RESEARCH DESIGN, SAMPLE SIZE, AND DATA COLLECTION TECHNIQUES.
- **KEY FINDINGS OR RESULTS:** SUMMARIZES THE PRIMARY OUTCOMES AND CONCLUSIONS.
- **LIMITATIONS:** NOTES ANY CONSTRAINTS OR WEAKNESSES IDENTIFIED BY THE AUTHORS.
- **RELEVANCE TO CURRENT STUDY:** EXPLAINS HOW THE SOURCE CONTRIBUTES TO THE LITERATURE REVIEW'S FRAMEWORK.

Additional Considerations

DEPENDING ON THE RESEARCH DISCIPLINE AND SPECIFIC NEEDS, OTHER ELEMENTS SUCH AS THEORETICAL FRAMEWORKS, GEOGRAPHICAL CONTEXT, OR STATISTICAL ANALYSES MAY BE INCLUDED. THE GOAL IS TO BALANCE COMPREHENSIVENESS WITH STRAIGHTFORWARDNESS, AVOIDING EXCESSIVE DETAIL THAT COULD CLUTTER THE TABLE.

Common Formats and Structures for Literature Review Tables

VARIOUS FORMATS EXIST FOR ORGANIZING A TABLE FOR LITERATURE REVIEW, EACH SUITED TO DIFFERENT TYPES OF RESEARCH AND PRESENTATION STYLES. CHOOSING THE APPROPRIATE STRUCTURE SUPPORTS EFFECTIVE DATA SYNTHESIS AND COMMUNICATION.

Chronological Format

THIS FORMAT ARRANGES STUDIES BY PUBLICATION DATE, ILLUSTRATING THE DEVELOPMENT OF RESEARCH OVER TIME. IT IS PARTICULARLY USEFUL FOR SHOWING TRENDS, SHIFTS IN METHODOLOGIES, OR EVOLVING THEORIES WITHIN A FIELD.

THEMATIC OR TOPICAL FORMAT

table for literature review: *Microwave Solution Combustion synthesis of Visible light responsive Photocatalyst for degradation of Reactive turquoise Blue (RB21) dye* RAHUL JARARIYA, 2022-11-08 Currently, colour removal dye degradation from synthetic wastewater of RB21 dye using photocatalysis with numerous spinel catalysts created in different methods. The reactive turquoise blue (RB21) dye, which belongs to the phthalocyanine group and has a strong azo link and a Cu²⁺ metal complex, is a very stable molecule that is difficult to degrade. Textile, paper,

and leather sectors all employ reactive dyes. Spinel ferrites are oxides with the general formula AB_2O_4 , where A and B are rare earth, alkali metal, and transition metal cations. Researchers have used spinel catalysts in photocatalytic degradation technology to combat wastewater pollution caused by dyes. The present research is focused on the creation of Magnesium and Cobalt ferrites spinel catalysts for the breakdown of RB21 dye. The most efficient photocatalyst was chosen, and the catalyst dosage, pH, dye concentration, reactor temperature, irradiation time, and other parameters were optimized. In the present work spinel catalysts ($CoFe_2O_4$, $MgFe_2O_4$, $Mg_{0.5}Co_{0.5}Fe_2O_4$, and $Ni_{0.5}Co_{0.5}Fe_2O_4$) were prepared by different methods. The operating conditions for spinel synthesis were observed at $146^\circ C$ commencing combustion of spinel ferrites. The experiments were performed under varying light sources like a 700W microwave system, and a Visible-Light photocatalytic reactor. The photocatalytic activity was carried out using a light source (two 9W LED bulbs, Halonix) and stirring the sample (400 rpm, $25^\circ C$).

table for literature review: Rethinking Sustainability Towards a Regenerative Economy Maria Beatrice Andreucci, Antonino Marvuglia, Milen Baltov, Preben Hansen, 2021-06-24 This open access book is based on work from the COST Action "RESTORE - REthinking Sustainability TOwards a Regenerative Economy", and highlights how sustainability in buildings, facilities and urban governance is crucial for a future that is socially just, ecologically restorative, and economically viable, for Europe and the whole planet. In light of the search for fair solutions to the climate crisis, the authors outline the urgency for the built environment sector to implement adaptation and mitigation strategies, as well as a just transition. As shown in the chapters, this can be done by applying a broader framework that enriches places, people, ecology, culture, and climate, at the core of the design task - with a particular emphasis on the benefits towards health and resilient business practices. This book is one step on the way to a paradigm shift towards restorative sustainability for new and existing buildings. The authors want to promote forward thinking and multidisciplinary knowledge, leading to solutions that celebrate the richness of design creativity. In this vision, cities of the future will enhance users' experience, health and wellbeing inside and outside of buildings, while reconciling anthropic ecosystems and nature. A valuable resource for scientists and students in environmental sciences and architecture, as well as policy makers, practitioners and investors in urban and regional development.

table for literature review: Performing Music Research Aaron Williamon, Jane Ginsborg, Rosie Perkins, George Waddell, 2021 What is it that drives people to undertake music research? Such interest frequently grows from on-the-ground experiences as learners, performers, facilitators, composers, arts administrators, and educators. It can emerge, for example, from music teachers trying out new teaching methods, performers wishing to know more about how to improvise effectively, educators pursuing the most effective ways to structure music curricula, musicians aiming to explain why their music enhances wellbeing among different groups of people, and orchestral managers seeking to promote and protect the health of their players. At the heart of all of these enquiries lies a question of some sort, and it is these research questions that determine the direction of the research to be undertaken. *Performing Music Research* is a comprehensive guide to planning, conducting, analyzing, and communicating research in music performance. The book examines the approaches and strategies that underpin research in music education, psychology, and performance science. It reviews the knowledge and skills needed to critique existing studies in these fields and to design and carry out new investigations. Perspectives on qualitative, quantitative, and multistrategy methodologies are highlighted across the book in ways that help aspiring researchers bring precision to their research questions, select methods that are appropriate for addressing their questions, and apply those methods systematically and rigorously. Each chapter contains a study guide, comprising a chapter summary, a list of keywords, and suggestions for further discussion, and the book concludes with a resources section, including a glossary and supplementary material to support advanced statistical analysis. The book's companion website provides information designed to facilitate access to original research and to test knowledge and understanding.

table for literature review: Finding Your Seat at the Table Susan M. Harnett, Lauren P. Cantwell-Jurkovic, 2022-02-19 Service on Institutional Review Boards (IRB) and Institutional Animal Care and Use Committees (IACUC) is an uncommon activity for librarians. Even librarians who participate in institutional research activities in a supportive capacity or conduct their own original

research as scholars themselves and are familiar with the IRB/IACUC research approval process, they may hesitate to participate more fully with these boards. There may be a perception that the work of the IRB and IACUC is too scientifically complex for librarians without an appropriate background. Library administrators may not advocate for librarian inclusion on the board for fear of additional burdens on the librarian's time; and university administrators might need some convincing of the librarian's suitability to perform this work. This book provides librarians with foundational knowledge of the IRB and IACUC, describes the work of these important committees, and expands librarians' conceptualization and knowledge of opportunities to create services and partnerships through participation. The book provides a progressively more comprehensive understanding of the work of these committees. Parts I and II discuss IRB and IACUC, respectively; their history, functions and membership. Part III highlights expanding roles for librarians on IRB and IACUC; and in institutional research activities. A special feature of this section describes the experiences of librarians, in their own words, who work with IRB or IACUC; what they have learned, how they have used their experiences to create partnerships and market library services; and what role they see for libraries and librarians in institutional research.

table for literature review: A Remote Sensing and GIS-based model of avian species habitat and its potential as a part of an environmental monitoring programme Thomas Gottschalk, 2014-04-11 Inhaltsangabe: Introduction: Over 10% (1186 species) of the bird species in the world are threatened with extinction in the near future, almost all of them due to habitat change or loss by man. Likewise, 1130 mammals, 296 reptiles, 146 amphibians and 5611 plants have been identified as endangered species. The destruction of natural habitat is the major factor contributing to the global species extinction event. The increasing loss of biodiversity has centred on conducting inventories and monitoring species and habitats, especially in identifying areas of high species richness, threatened species and species of restricted or local distribution. In 1992 the UNCED-Conference in Rio de Janeiro pointed out the need for monitoring the environment, leading to the Convention on Biological Diversity and the Agenda 21. Article 7 of the Convention on Biological Diversity deals with identification and monitoring, which are to be undertaken with sampling and other techniques. New methodologies with a view to undertaking systematic sampling and evaluation of the components of biological diversity are to be developed. While the number of identified threatened species has increased dramatically, a huge gap in knowledge of ecosystems and their fauna and flora remains. Distribution, status and ecology of species are mostly unknown in many countries, as is the degree they are endangered. In view of the immense unknown ecosystems in the world, a great number of which are located in developing countries, conventional survey and mapping methods cannot deliver the necessary information in a timely and cost-effective fashion. Nature conservation will require large volumes of Remote Sensing (RS) data if the quality of planning is to improve. With RS technology, we may be able to make real progress in understanding why more species occur in some places than in others and in identifying the most critical places that must be protected to preserve the maximum number of species into the 22nd century and beyond. As current air photos are often not available, satellite images are the sole source of data for many regions of the world. Fortunately, computer technology has improved enormously in the last years, mainly processing time, storage requirements as well as programme features and possibilities. Concurrent declining costs of computer hardware have favoured the design of new techniques for special data processing and combining remotely sensed information with other extensive [...]

table for literature review: Routledge Handbook of African Social Work Education Susan Levy, Uzoma Odera Okoye, Pius T. Tanga, Richard Ingram, 2024-06-06 This timely Routledge Handbook creates a much-needed space to explore what makes social work uniquely African, as well as shaping, informing, and influencing a new culturally relevant era of social work. The specific focus on social work education offers approaches to transition away from the hegemony of Western literature, knowledge, and practice models underpinning African social work education. The authors identify what is relevant and meaningful to inform, influence, and reconceptualise culturally relevant social work curriculum. Covering Botswana, Cameroon, Ethiopia, Ghana, Guinea, Kenya, Malawi, Nigeria, South Africa, Tanzania, Uganda, Zambia, and Zimbabwe, the Handbook comprises both empirical and conceptual chapters, multiple approaches, case studies, and key debates on social work education. It is structured in four parts: • Approaches to Indigenising, Decolonising and Developing Culturally Relevant Social Work Education • Social Work Education: Evolution across Contexts • Embedding Field Practicum into Social Work Education • Knowledge Exchange between the Global South and Global North. The range of indigenous, local knowledge that the Handbook presents is crucial to social work evolving and facilitating for reciprocal learning and knowledge exchange between the Global South and Global North. Whilst the context of the Handbook is Africa, the topics covered are relevant to a global audience engaged in social justice work across social work, social welfare, social development, and sustainability.

table for literature review: Management Control Systems and Cross-Cultural Research Michael Hanzlick, 2015-01-31 A fundamental challenge that management faces in the twenty-first century is how to exercise adequate control, i. e. how to guide and direct the behaviour of their subordinates. With increasing globalisation firms witness a cross-cultural impact too. Of particular interest is the question of whether to use the standardized form of control similar to the home base of firms or whether to adapt their control practices to the local specificities. Given the meagre state of the literature in management control with a cross-cultural emphasis, this study addresses a real world problem, namely the question whether management control practices are configured similarly or differently across cultures. Relying on a generalized industry sample across four countries (Belgium, Canada, Germany and Poland), this study sought to shed light on one of the more intriguing questions – “does culture matter” – for specific control areas, in particular for performance measurement, performance evaluation and reward systems. The theoretical foundations are grounded in the cultural framework of the GLOBE project accompanied by thoughts of new institutionalism, stakeholder theory and contingency thoughts. Hypotheses are tested by mean comparisons (ANOVA, ANCOVA). The empirical findings highlight cultural differences for a

broader set of control practices and deliver new insights into the intersection of culture and management control. This dissertation crafts a novel topic with high relevance for both researchers and practitioners. The study demonstrates areas for which management control practices should be adapted to the local needs and areas for which those practices could be harmonized in the whole company. This monograph stresses some areas in which future empirical cross-cultural research can benefit, and some areas where conceptual thoughts could be advanced.

table for literature review: Modelling, Control and Stability Analysis of Photovoltaic Systems in Power System Dynamic Studies Gustav Lammert, 2019 This thesis investigates the impact of: i) the low voltage ride-through and dynamic voltage support capability; ii) the active current recovery rate; iii) the local voltage control; and iv) the plant-level voltage control of large-scale photovoltaic systems on short-term voltage stability and fault-induced delayed voltage recovery as well as transient and frequency stability. The power system dynamic performance is analysed using state-of-the-art methods, such as phasor mode time-domain simulations and the calculation of the critical clearing time that determines the stability margin. Moreover, the recently developed Kullback-Leibler divergence measure is applied to assess the quality of the voltage recovery. Drawbacks of this metric are outlined and a novel metric, the so-called voltage recovery index, is defined that quantifies the delayed voltage recovery more systematically. The studies are performed with a generic photovoltaic system model and typical model parameters are used that were determined in collaboration with a manufacturer. The stability analysis is performed in DIgSILENT PowerFactory using: i) a one-load infinite-bus system; and ii) an IEEE multi-machine voltage stability test system, namely the Nordic test system. The results show that with the adequate control of photovoltaic systems, power system dynamic performance can be significantly improved.
