take care in italian language: Who Shall Take Care of Our Sick? Bernadette McCauley, 2020-03-03 This rich history chronicles the prominent role of Catholic women religious in establishing the hospitals at the core of New York City's extensive Catholic medical network. Beginning with the opening of St. Vincent's Hospital in 1849, Bernadette McCauley relates how determined and pragmatic women of faith worked over the next eighty years to place the Catholic Church in the mainstream of American medicine. Exploring the differences and similarities between Catholic hospitals and other hospitals, McCauley describes the particular cultural sensibility and management style that informed Catholic health care and gauges the ultimate success of Catholic efforts. Visionary sisters established, managed, and staffed the hospitals, and they sat on hospital boards and served as administrators at a time when women rarely occupied positions of leadership in business. McCauley illustrates how they at once embraced the world of God and the world of man, playing an unheralded role in the development of the modern hospital while serving the daily needs of New York's immigrant poor. Encompassing such issues as immigration, the education of nurses and doctors, hospital care and organization, and the role of women in the Catholic church, this extensive study is a valuable resource for scholars and students in the history of medicine, history of nursing, American religion, and women's history.

Some states have a long and well-established tradition of bilingual legal education; others have only recently started to develop a legal education system through non-dominant languages; finally, in some other cases only partial bilingual legal education obtains, rather than a fuller model. The volume purports to examine best practices and to draw useful lessons from the experiences of other bilingual societies.

take care in italian language: Women, Desire, and Power in Italian Cinema M. Cottino-Jones, 2010-02-15 Women, Desire, and Power in Italian Cinema offers, for the first time in Italian Cinema criticism, a contextual study of the representation of women in twentieth-century Italian films. Marga Cottino-Jones argues that the ways women are depicted on screen reflects a subconscious sexual conservatism typical of an Italian society rooted within a patriarchal ideology. The book then follows the slow but constant process of social awareness in the Italian society through women in film, especially after the 1950s. Comprehensive in scope, this book analyzes the films of internationally known male and female directors, such as Antonioni, Fellini, Rossellini, Visconti, Bertolucci, Benigni, Cavani, Wertmuller, Comencini, and Archibugi. Special consideration is given to the actresses and actors that have become the icons of Italian femininity and masculinity, such as Sofia Loren, Gina Lollobrigida, Silvana Mangano, Gian Carlo Giannini, Marcello Mastroianni, and Alberto Sordi.
