tales of arise beyond the dawn physical: The Doctrine of Awakening Julius Evola, 2018-07-13 In a probing analysis of the oldest Buddhist texts, Julius Evola places the doctrine of liberation in its original context. The early teachings, he suggests, offer the foremost example of an active spirituality that is opposed to the more passive, modern forms of theistic religions. This sophisticated, highly readable analysis of the theory and practice of Buddhist asceticism, first published in Italian in 1943, elucidates the central truths of the eightfold path and clears away the later accretions of Buddhist doctrine. Evola describes the techniques for conscious liberation from the world of maya and for achieving the state of transcendence beyond dualistic thinking. Most surprisingly, he argues that the widespread belief in reincarnation is not an original Buddhist tenet. Evola presents actual practices of concentration and visualization, and places them in the larger metaphysical context of the Buddhist model of mind and universe. The Doctrine of the Awakening is a provocative study of the teachings of the Buddha by one of Europe's most stimulating thinkers.

tales of arise beyond the dawn physical: Old Tales and New Truths James Roy King, 1992-01-01 This guidebook to the Bright-Shadow World develops three closely related issues. The first is the position that fairytales and folktales are of value today because they encourage the growth of capabilities important in our postmodern world. Each of us, like the fairytale hero, sets out on his/her own quests, seeks his/her own identity, faces his/her own dilemmas with few resources but wit, imagination, and a certain power of improvisation. King develops the implications of this situation for such common fairytale problems as learning to read the world productively; navigating various kinds of edges; exploiting power sources; developing highly personal moral commitments; problem solving; and data collecting. The second concern of this book is with the development of a

system for analyzing narrative structure. The formula offered here involves an examination of interactions among actors, physical settings, lines of force, and power sources as a narrative moves toward its denouement. This system facilitates the classifying, and contrasting of narratives, and illuminates the structure of both narrative and lived experience. Finally, this book is concerned with myth-making or world-making processes. It is shown that traditional narrative actually points to and delineates another dimension of existence (here called the Bright-Shadow World) that operates by rules of its own and may be penetrated by individuals from our ordinary world. Inferences about the Bright-Shadow World drawn from traditional narrative are described and evaluated.

tales of arise beyond the dawn physical: Fear and Nature Christy Tidwell, Carter Soles, 2021-05-10 Ecohorror represents human fears about the natural world—killer plants and animals, catastrophic weather events, and disquieting encounters with the nonhuman. Its portrayals of animals, the environment, and even scientists build on popular conceptions of zoology, ecology, and the scientific process. As such, ecohorror is a genre uniquely situated to address life, art, and the dangers of scientific knowledge in the Anthropocene. Featuring new readings of the genre, *Fear and Nature* brings ecohorror texts and theories into conversation with other critical discourses. The chapters cover a variety of media forms, from literature and short fiction to manga, poetry, television, and film. The chronological range is equally varied, beginning in the nineteenth century with the work of Edgar Allan Poe and finishing in the twenty-first with Stephen King and Guillermo del Toro. This range highlights the significance of ecohorror as a mode. In their analyses, the contributors make explicit connections across chapters, question the limits of the genre, and address the ways in which our fears about nature intersect with those we hold about the racial, animal, and bodily “other.” A foundational text, this volume will appeal to specialists in horror studies, Gothic studies, the environmental humanities, and ecocriticism. In addition to the editors, the contributors include Kristen Angierski, Bridgitte Barclay, Marisol Cortez, Chelsea Davis, Joseph K. Heumann, Dawn Keetley, Ashley Kniss, Robin L. Murray, Brittany R. Roberts, Sharon Sharp, and Keri Stevenson.
