They only seem like miracle cures because of your unhealthy diet & the saturation of poisons in your food, drinks and water supplies and your personal hygiene items ! The Self-Care Health Care Guide is A Health and Food Guide to Cure and Prevent Most Diseases and Medical Conditions. The Self -Care Health Care Guide includes cures for arthritis, bleeding gums, gout, dandruff, headaches and even diseases like breast cancer. This book empowers you with the knowledge to save your own life and cure yourself of any and all disease. This book is not from some author who picked this book to be his next subject to write a book about ! No, this book was written by a man who had to learn these things he shares in this book just to save his own life ! After doctors diagnosed him with chronic kidney disease, he was told he would be on dialysis or dead by 2008 or 2009. And without any help for his kidneys from the medical profession, he used himself as the guinea pig to see if he could make his kidneys better and thus, save his own life. Doctors have no cures. Doctors only prolong your diseases to maximize their income. To back that up, Chapter 12 states - Now, with 133,000,000 Americans who have at least one chronic disease.....is that what you call the result of the best health care system in the world ? Yes you do ! But it's complete nonsense.

Each of those 133,000,000 Americans represents a failure of this country's medical profession. Even with 10,000,000 Americans with chronic disease, we should have declared a national emergency. But with 133,000,000 Americans with at least one chronic disease we not only haven't declared a national emergency, we continue to declare that we have the best health care on the planet ! If every single person had at least one chronic disease, they would still tell you that.....and you would still believe them ! I don't know of any greater incompetence in any profession or line of work than this country's medical profession and health care system. Chapter 9 says - avoiding poisons is the key to preventing and curing cancer. This is why all cancer patients should get serious about avoiding and eliminating poisons..... (in our food drinks and water supplies) Doing what this book says can cure you of any and all diseases that you have; and do so within a matter of months; with improvement coming within just a few weeks.
