Stage Dimensions and Layout

The stage at Tarrytown Music Hall is designed to accommodate a wide variety of performance types, offering ample space and flexibility for different production requirements. It is a proscenium stage with classic architectural details that enhance both visibility and the overall aesthetic experience. The stage floor is constructed of durable hardwood, suitable for dance, theater, and musical performances.

Stage Size

The main stage measures approximately 40 feet wide and 30 feet deep, providing a substantial performance area. The proscenium opening is 32 feet wide by 20 feet high, allowing for large set pieces and scenic elements. The stage height from floor to grid is roughly 35 feet, which permits effective use of vertical space for set design and lighting rigging.

Stage Layout and Features

The stage includes an orchestra pit that can be covered or uncovered depending on the type of event. There are also stage wings on both sides, each approximately 10 feet wide, used for storage of props and quick costume changes. The floor is level with minor ramps to the wings for easy mobility of equipment and performers.

- Proscenium opening: 32' wide x 20' high
- Stage width: 40'
- Stage depth: 30'
- Stage height to grid: 35'

Sound System and Acoustic Features

The Tarrytown Music Hall is well-regarded for its outstanding acoustics, designed to enhance both amplified and unamplified sound. The venue employs a state-of-the-art sound reinforcement system that can be tailored to the specific needs of any event, ensuring clear and balanced audio throughout the auditorium.

Audio Equipment

The sound system includes a digital mixing console with at least 32 channels, high-quality speakers positioned strategically for optimal coverage, and subwoofers to support low-frequency sounds. Wireless microphone systems and direct input (DI) boxes are also available to accommodate a variety of performance types.

Acoustic Design

The hall's interior features sound-reflective surfaces and carefully designed architectural elements that contribute to natural sound distribution. Acoustic panels and curtains can be adjusted to modify reverberation times, making the space versatile for different genres such as classical music, spoken word, or amplified rock concerts.

- Digital mixing console (32+ channels)
- Line array speakers and subwoofers
- Wireless microphones and DI boxes

- Adjustable acoustic treatments

Lighting Equipment and Capabilities

Lighting at Tarrytown Music Hall is engineered to support both theatrical and concert lighting designs. The venue offers a comprehensive inventory of lighting fixtures, control consoles, and rigging options to create dynamic visual effects and proper stage illumination.

Lighting Fixtures

The lighting inventory includes LED pars, ellipsoidal spotlights, fresnels, and moving head fixtures, providing designers with a broad palette of lighting styles and colors. The house lighting system is integrated with a modern DMX control board that allows for precise programming and real-time adjustments.

Lighting Control and Power

The lighting control console supports up to 512 DMX channels and is compatible with various lighting protocols. Power distribution is robust, with multiple circuits available on stage and in the lighting grid to accommodate large lighting rigs. Dimmers and patch panels are regularly maintained for optimal performance.

- LED pars, ellipsoidal, fresnels, moving heads
- DMX lighting control board (512 channels)
- Multiple power circuits and dimmers
- Flexible grid and pipe positions for fixture mounting

Rigging and Fly System

Tarrytown Music Hall features a traditional counterweight fly system that allows for efficient movement of scenery, lighting, and curtains. The rigging system is designed to meet professional production standards, supporting complex set changes and scenic effects.

Fly System Specifications

The fly system includes 30 line sets with a maximum load capacity of 1000 pounds per set. Lines are counterweighted and operate smoothly for quick scene changes. The grid height of 35 feet facilitates

vertical flying of large set pieces and backdrops.

Safety and Compliance

All rigging equipment is inspected regularly to ensure compliance with safety regulations. The venue employs trained stagehands to operate the fly system during performances to maintain safe and efficient rigging practices.

- 30 counterweight line sets
- Load capacity: 1000 lbs per line set
- Grid height: 35 feet
