Umamaheshwari, 2018-01-25 This book provides a social history of the Tamil Jainas, a minority community living in Tamil Nadu in south India. It holds special significance in the method of studying the community, living in villages of Tamil Nadu and retrieving their perspectives on their past. This is a new approach in terms of historiography from extant works on Jainism in south India. A major feature of this book is the hitherto uncovered aspect of the question of language and identity, caste and the modern socio-political movements in Tamil Nadu, such as the Self-Respect Movement (initiated by 'Periyar'), in which some Tamil Jainas were active participants. Special features in the book include photographs of the community and monuments, maps, and a unique style, which combines a journalistic approach and academic historical research. tamil nadu district map in tamil language: Why Ethnic Parties Succeed Kanchan Chandra, 2007-02-15 Why do some ethnic parties succeed in attracting the support of their target ethnic group while others fail? In a world in which ethnic parties flourish in both established and emerging democracies alike, understanding the conditions under which such parties rise and fall is of critical importance to both political scientists and policy makers. Drawing on a study of variation in the performance of ethnic parties in India, this book builds a theory of ethnic party performance in 'patronage democracies'. Chandra shows why individual voters and political entrepreneurs in such democracies condition their strategies not on party ideologies or policy platforms, but on a headcount of co-ethnics and others across party personnel and among the electorate.

tamil nadu district map in tamil language: Gender, Development, and the State in India Carole Spary, 2019-02-21 This book explores the relationship between the state, development policy, and gender (in)equality in India. It discusses the formation of state policy on gender and development in India in the post-1990 period through three key organising concepts of institutions, discourse, and agency. The book pays particular attention to whether the international policy language of gender mainstreaming has been adopted by the Indian state, and if so, to what extent and with what results. The author examines how these issues play out at multiple levels of governance - at both the national and the subnational (state) level in federal India. This comparative aspect is particularly important in the context of increasing autonomy in development policymaking in India in the 1990s, divergent development policy approaches and outcomes among states, and the emerging importance of subnational state development policies and programmes for women in this period. The author argues that the state is not a monolith but a heterogeneous, internally differentiated collection of institutions, which offers complex and varying opportunities and consequences for feminists engaging the state. Demonstrating that the Indian empirical case is illuminating for studies of the gendered politics of development, and international debates on gender mainstreaming, the book highlights the politics of negotiating gender equality strategies in the contemporary context of neo-liberal development and brings together complex issues of modernity, postcolonialism, identity politics, federalism, and equality within the broader context of the world's largest democracy. This book will be of interest to scholars interested in the politics of gender equality, state feminism, and gender mainstreaming; federalism and multi-level governance; and development studies and gender in South Asia.

Many cultures worldwide have practised it in some form. In some it is rudimentary, in others complex. Culture and scholarship have categorised it as both belief and science, as a form of magic, divination or religious practice - but in many ways it defies easy categorisation. The chapters in this volume make a significant contribution to our understanding of astrology across a range of periods of cultures. Based on papers presented at the annual conference of the Sophia Centre held in 2012, the contributions range from China and Japan, through India, the ancient Near East, the classical world and early modern Europe, to Madagascar and Mesoamerica. The different topics include ritual and religion, magic and science, calendars and time, and questions of textual transmission and methodology. Astrology in Time and Place is essential reading for all interested in the history of humanity's relationship with the cosmos.
