Program Overview

The Tallahassee Memorial Family Medicine Residency is a fully accredited graduate medical education program that prepares physicians for independent practice in family medicine. The residency is affiliated with Tallahassee Memorial HealthCare, a regional medical center known for its commitment to quality care and community service. The program is structured to provide a balanced education in outpatient and hospital medicine, with exposure to a variety of patient populations and clinical settings. Emphasis is placed on preventive care, chronic disease management, and the social determinants of health affecting the Tallahassee community. Graduates leave equipped to deliver comprehensive primary care and to serve as leaders in their communities.

Program Mission and Goals

The mission of the Tallahassee Memorial Family Medicine Residency is to educate competent, compassionate family physicians who deliver high-quality, evidence-based care and address the health needs of diverse populations. The program aims to:

- Develop clinical expertise in all aspects of family medicine
- Promote lifelong learning and professional growth
- Encourage community engagement and advocacy
- Foster research and quality improvement initiatives
- Prepare residents for board certification and successful careers

Curriculum and Training

The curriculum at Tallahassee Memorial Family Medicine Residency is comprehensive and designed to meet the evolving needs of family medicine practitioners. It provides progressive responsibility over three years, integrating core family medicine knowledge with subspecialty exposure. The program utilizes evidence-based guidelines and incorporates patient safety and quality improvement principles throughout the training.

Clinical Rotations

Residents rotate through a variety of clinical settings to build a broad skill set:

- **Outpatient Family Medicine:** Primary care clinics focusing on preventive care, chronic disease management, and acute illness treatment.
- **Inpatient Medicine:** Hospital-based care involving medical wards, emergency medicine, and critical care units.
- **Pediatrics:** Comprehensive care for infants, children, and adolescents.
- **Obstetrics and Gynecology:** Prenatal care, deliveries, and women's health services.
- **Surgery and Specialty Clinics:** Exposure to orthopedic, dermatology, psychiatry, and other specialty areas relevant to family medicine.

Didactic Education and Conferences

Structured educational sessions supplement clinical training, including weekly lectures, journal clubs, case presentations, and simulation exercises. These activities enhance knowledge retention, critical thinking, and clinical decision-making. Residents participate in morbidity and mortality conferences and interdisciplinary meetings to develop collaborative skills.

Faculty and Mentorship

The residency program is supported by a dedicated team of experienced faculty members committed to resident education and professional development. Faculty members are board-certified family physicians with diverse clinical interests and academic expertise. They provide personalized mentorship, fostering an environment that encourages questions, research, and innovation in patient care.

Role of Faculty in Resident Development

Faculty serve as clinical preceptors, educators, and advisors throughout the residency. They guide residents in clinical reasoning, procedural skills, and patient communication. Regular feedback sessions and evaluations ensure continuous improvement and goal setting. The faculty also encourages residents to participate in scholarly projects and community outreach initiatives.

Resident Life and Support

Resident well-being and professional growth are priorities at the Tallahassee Memorial Family Medicine Residency. The program offers resources to support work-life balance, mental health, and career planning. Residents benefit from a collegial atmosphere and access to wellness programs designed to mitigate burnout.

Community and Lifestyle

Living and training in Tallahassee provides residents with a vibrant community rich in cultural, recreational, and outdoor activities. The residency fosters camaraderie through social events, peer support groups, and team-building exercises. Residents develop lifelong professional relationships and friendships within this collaborative environment.

Benefits and Resources

- Competitive salary and comprehensive benefits package
- Access to medical libraries and electronic resources
- Opportunities for leadership roles within the program
- Support for attending regional and national conferences
- On-site counseling and wellness services

Application Process and Requirements

The Tallahassee Memorial Family Medicine Residency participates in the National Resident Matching Program (NRMP) and follows standard application procedures for graduate medical education. The program seeks candidates who demonstrate academic excellence, strong interpersonal skills, and a commitment to family medicine.

Eligibility Criteria

Applicants must have graduated from an accredited medical school, possess a valid ECFMG certificate if international medical graduates, and hold appropriate licensure. Clinical experience in primary care settings and involvement in community service are highly desirable.

Application Components

- Electronic Residency Application Service (ERAS) application
- Personal statement expressing interest in family medicine and the residency
- Curriculum vitae outlining clinical experience and accomplishments
- Three letters of recommendation, preferably from family medicine faculty
- Medical school transcripts and USMLE scores

Interview Process

Selected applicants are invited for interviews to assess their fit with the program's mission and culture. Interviews include meetings with faculty, residents, and program leadership. Candidates receive detailed information about the curriculum, expectations, and resident life during the interview day.

tallahassee memorial family medicine residency: Family Medicine A.K. David, T.A.Jr. Johnson, D.M. Phillips, J.E. Scherger, Robert B. Taylor, 2013-06-29 Much is new in Family Medicine since the last edition of our textbook. For example, not only is the therapy of human immunodeficiency virus (HIV) disease and the acquired immunodeficiency syndrome (AIDS) much different than a few years ago; the epidemiology of the disease has also changed and more than half of the family physicians in a rural state such as Oregon have already managed patients with HIV disease or AIDS. 1 There are new immunization recommendations for children and new antibiotics for the treatment of bacterial infections. Computers are bringing medical informatics and on-line consultation into office practice. Medicare physician payment reform is underway and the reality of rationing medical care has been recognized. There has been a recent increase in student interest in a family practice career,2 coincidental with a Council on Graduate Medical Education (COGME) recommendation that at least 50 percent of all residency graduates 3 should enter practice as generalists. Also there is increasing awareness of the need for a 4 Center for Family Practice and Primary Care at the National Institutes of Health. This all-new fourth edition is intended to present the scientific and practical basis of family medicine with special attention to what's new in family medicine. The emphasis is on how the physician provides continuing and comprehensive care for

persons of all ages, with clinical content selected from the perspective of family physicians. The format of the book, like the practice of family medicine, continues to change.

tallahassee memorial family medicine residency: Family Medicine John L. Buckingham, E.P. Donatelle, Thomas A. Jr. Johnson, Joseph E. Scherger, Robert B. Taylor, 2013-11-21 New material in a new format is contained in this third edition of Family Medicine. The comprehensive text nevertheless remains true to the goal of previous editions in offering a scientific approach to health and illness within the context of the family. Using up-to-date clinical material, the book demonstrates how the family physician may provide comprehensive health care to persons of all ages. The first part of Family Medicine discusses such topics as the conceptual basis of family as discipline and specialty, problem differentiation, family-centered health care, longitudinal care, clinical reasoning, and resource management. The second part explores both problems related to organs and systems and problems related to the person, family and community, including: pregnancy, care of infants, children, adolescents, and the elderly; behavioral and psychiatric problems; emergency and critical care; sports medicine; alcoholism and substance misuse; environmental health; and neoplastic and infectious diseases. Family Medicine, with its greatly expanded in-depth coverage of the most commonly encountered clinical core problems and procedures in family medicine, continues to be a textbook written and edited by family physicians for family physicians.

tallahassee memorial family medicine residency: MindBody Medicine Leo W. Rotan, Veronika Ospina-Kammerer, 2012-10-12 MindBody Medicine encapsulates a variety of interventions designed to change, strengthen, or enhance a patient's thoughts, emotions, and behaviors in order to promote improved health and wellness. There has been a growing trend among professionals in the health care fields to better understand the mind-body connection. How do the body and mind interact and, more specifically, how can we use the energy of the mind to heal the body? Leo Rotan and Veronika Ospina-Kammerer have sifted through already existing works on this topic and compiled a comprehensive overview of this expanding field of study. As a result, MindBody Medicine provides students and practitioners in a range of health care professions with a guide to more fully understand the relationship between body and mind.
