talía price pew research center: *Theorizing Motherhood and Emerging Adulthood* Maya Bhavé, Talia Esnard,, Kae Solomon, 2025-05-14 While motherhood as an area of scholarship has been significantly advanced with extensive global theorizations, examinations of the thinking and experiences around mothering emerging adults are still in need of deeper interrogation. This edited volume addresses this gap with a rich array of empirical, reflective and creative pieces that speak to the contextual, emotive or affective, discursive and performative aspects of mothering. The volume is framed around the theoretical concepts of normative motherhood, maternal regret, silence and maternal/social transitions. The contributing authors bring to light new and innovative analyses on subjects including, but not limited to, eco-disconnect, non-proximate and e-mothering, neurodiversity, abuse, mental health issues and mothering, tiger mothering and racialized understandings of mothering emerging adults. The findings revealed within this volume broaden our understanding of the often-unexamined latter period of the motherhood arc.

talía price pew research center: *Feminist Existentialism, Biopolitics, and Critical Phenomenology in a Time of Bad Health* Talia Welsh, 2021-10-28 This book explores the personal value of healthy behavior, arguing that our modern tendency to praise or blame individuals for their health is politically and economically motivated and has reinforced growing health disparities between the wealthy and poor under the guise of individual responsibility. We are awash in concerns about the state of our health and recommendations about how to improve it from medical professionals, public health experts, and the diet-exercise-wellness industry. The idea that health is about wellness and not just preventing illness becomes increasingly widespread as we find out how various modifiable behaviors, such as smoking or our diets, impact our health. In a critical examination of health, we find that alongside the move toward wellness as a state that the individual is responsible to in part produce, there is a roll-back of public programs. This book explores how this good health imperative is not as apolitical as one might assume. The more the individual is the locus of health, the less structural and historical issues that create health disparities are considered. *Feminist Existentialism, Biopolitics, and Critical Phenomenology in a Time of Bad Health's* charts the impact of the increasing shift to a model of individual responsibility for one's health. It will benefit readers who are interested to think critically about normalization to produce healthy bodies. In addition, this book will benefit readers who understand the value of personal health, but are wary of the ways in which health can be used as a tool to discriminate and fuel inequalities in health care access. This volume is primarily of interest to academics, students, public health and medical professionals, and readers who are interested in critically examining health from philosophical perspective in order to understand how we can celebrate the value of healthy behavior without reinforcing discrimination. development—and how it can guide us toward a future in which every child has the opportunity to fulfill their potential. Her prescription for this more prosperous and equitable future, as clear as it is powerful, is more robust support for parents during the most critical years of their children's development. In her poignant new book, *Parent Nation*, written with award-winning science writer Lydia Denworth, Dr. Suskind helps parents recognize both their collective identity and their formidable power as custodians of our next generation. Weaving together the latest science on the developing brain with heart-breaking and relatable stories of families from all walks of life, Dr. Suskind shows that the status quo—scores of parents convinced they should be able to shoulder the enormous responsibility of early childhood care and education on their own—is not only unsustainable, but deeply detrimental to the wellbeing of children, families, and society. Anyone looking for a blueprint for how to build a brighter future for our children will find one in *Parent Nation*. Informed by the science of foundational brain development as well as history, political science, and the lived experiences of families around the country, this book clearly outlines how society can and should help families meet the developmental needs of their children. Only then can we ensure that all children are able to enjoy the promise of their potential.
