taser training near me: Electric-Shock Weapons, Tasers and Policing Abi Dymond, 2021-10-24 Building on five years of research, and drawing on criminology, science and technology studies (STS), socio-legal studies and social psychology, this book is the first non-medical book written on electric-shock weapons, of which the best well known is the TASER brand. This book challenges some of the myths surrounding the use of these weapons and considers their human rights implications and impact on members of the public and officers alike. Drawing on STS, it also considers the role and impact of electric-shock technologies, examines the extent to which technologies and non-human agency may also play a role in shaping officer decision making and discretion, and contributes to long standing debates about police accountability. This is essential reading for policing scholars around the world, particularly those engaged with use of force, culture and accountability, as well as those engaged with Science and Technology studies.

taser training near me: Daughter of the Heartland Joni Ernst, 2020-05-26 Combining the by-the-bootstraps work ethic of Nikki Haley's *Can't Is Not an Option* with the military pluck of MJ Heger's *Shoot Like a Girl*, Joni Ernst's candid memoir details the rise of one of the most inspiring and authentic women in the United States Senate. The daughter of hardworking farmers in the heartland, Joni Ernst has never been afraid to roll up her sleeves and get the job done. Raised in rural Iowa, Joni grew up cleaning stalls, hauling grain, and castrating hogs. Farm life forged her work ethic. She developed grit and tenacity, attributes that would later be put to the test when she faced abuse, sexism, and harassment. First, as a Lieutenant Colonel in the Army and later as an underdog candidate in the US Senate, Joni has proven to be a natural leader who proudly serves her fellow Americans. She had to learn to believe when others didn't, to raise her own voice for those who couldn't, and to silence the naysayers (even herself) to become a bold leader and a fierce advocate. In her inspiring memoir, Joni shares her struggles and the invaluable lessons she learned through hardship—on the farm, in the home, and at work. As a woman fighting for position in the boys' clubs of the military and politics, she found strength in courage and vulnerability, becoming a role model for women everywhere. As a US Senator, Joni is well-known and respected for her fight to hold Washington accountable and her demand for bipartisanship in a time of fierce tribalism. *Daughter of the Heartland* tells Joni's incredible story in four parts, defined by the values she's learned along the way—leadership, service, courage, and gratitude. Written in an honest and compelling voice, *Daughter of the Heartland* is Joni's inspirational story of finding her place as a champion for Iowa, a defender of our armed forces, and a voice for women.

taser training near me: Cop Cop Mac Muir, Greg Finch, 2025-04-29 In the vein of *Evicted* and *Locking Up Our Own* comes a seminal work that delves deep behind the "Thin Blue Line" of policing and police misconduct to demonstrate what really goes on when you try to hold the police accountable. How often do you think about the police? Who do you think of? Columbo? Chief Wiggum? Derek Chauvin? Do you think of just one officer, or do you think of the police as an institution? From movies and television to everyday life, a police presence looms over most conflict. Today, we know this to be most true for Black Americans, for whom the suspense of policing is constant. And too often, the argument over dinner devolves into a 9-1-1 call, blue and red lights, and possibly a door rammed open. Some of us are watched by the police, and others are chased. But if there was a defining feature of the 2020 protests over the murder of George Floyd, it was the collective confusion about how we got to this point. Policing, it seemed, had become ahistorical as it was brutal. Despite fragmented coverage about police unions, militarization, and systemic racism, America remained hazy on the details of what cops had been doing all along. There is a Blue Wall, and ways to get behind it. The authors of this book, Anon 1 and Anon 2, are senior investigators of a government agency tasked with policing the police in New York City. They're our eyes on the inside, and this book will take us into their world. *COP COP* follows the web of real cases that the authors investigated over several years inside the Civilian Complaint Review Board. As they investigate everything from offensive language and chokeholds to shootings, the larger investigation builds into their argument for six simple solutions to fix American policing. Readers will come away with a new vantage point, as well as the tools of an investigator. By combining their unique perspectives as police misconduct investigators with a synthesized history of policing, this book offers newfound insights into what policing really looks like, what the problems are, and what practical steps are necessary to create a criminal justice system that is truly just.

taser training near me: Gold Medal Policing Judy M. McDonald, 2025-03-24 This straightforward, easy-to-understand textbook inspires tools for improving job performance, productivity, and morale in law enforcement. The groundbreaking first edition of *Gold Medal Policing*, inspired by work with Olympic athletes, confirmed the importance of mental readiness in frontline policing excellence. Partnerships with policing and related fields positioned *Gold Medal*

Policing principles across recruitment, multilevel training, web-based learning, and field assessment. The second edition consolidates two decades of peer-reviewed research and training, reflecting new trends, lessons, contemporary issues, and proven tools. Drawing on insights from frontline officers recognized for their excellence, including coach officers, it introduces an Operational Readiness Framework rooted in scientific principles. This framework systematically assesses physical, technical, and mental readiness, creating a detailed police-specific profile. A comprehensive literature review informs current police preparedness practices. Mental readiness is upheld to strict, measurable standards, akin to traditional physical and technical readiness. Best practices from exceptional officers are isolated, and operational benchmarks and strategies are established. The ultimate result is to empower officers to excel in the practice of their profession. Gold Medal Policing is indispensable for law enforcement leaders, scholars, students, and aspiring officers. taser training near me: Collecting the Dead Spencer Kope, 2025-09-23 Magnus Steps Craig is part of the elite three-man Special Tracking Unit of the FBI. Called in on special cases where his skills are particularly needed, he works as a tracker. The media dubs him The Human Bloodhound, since Steps is renowned for his incredible ability to find and follow trails over any surface better than anyone else. But there's a secret to his success. Steps has a special ability---a kind of synesthesia---where he can see the 'essence' of a person, something he calls 'shine,' on everything they've touched. His ability is known to only a few people---his father, the director of the FBI, and his partner, Special Agent Jimmy Donovan. When the remains of a murdered woman are found, Steps recognizes the shine left by the murderer from another crime scene with a physically similar victim. And he uncovers the signature at both scenes---the mark of a sad face. At the same time, another killer, one Steps has dubbed Leonardo and has been trying to track for over ten years, appears again, taunting Steps. But while Steps tries to find a clue that will lead him to Leonardo, the case of the Sad Face Killer heats up. The team uncovers eleven possible victims: missing women who fit the same pattern. Using his skill and the resources of the Bureau, it is a race against time to find the killer before it's too late.

taser training near me: A 52-Hertz Whale Bill Sommer, Natalie Haney Tilghman, 2015-09-01 It appears to be the only individual emitting a call at this frequency and hence, has been described as the world's loneliest whale.—Wikipedia So here's how it all starts: James, a high school freshman, is worried that the young humpback whale he tracks online has separated from its pod. So naturally he emails Darren, the twentysomething would-be filmmaker who volunteered in James's special education program back in middle school. Of course, Darren is useless on the subject of whales, but he's got nothing but time, given that the only girl he could ever love dumped him. And fetching lattes for his boss has him close to walking out on his movie dream and boomeranging right back to his childhood bedroom. So why not reply to a random email from Whale Boy? Predictably, this thread of emails leads to a lot of bizarre stuff, including a yeti suit, drug smuggling, widows, a major documentary filmmaking opportunity, first love, a graveyard, damaged echolocation, estranged siblings, restraining orders, choke holds, emergency dentistry...and then maybe ends with something like understanding. See, it turns out that the thing that binds people together most is their fear that nothing binds them together at all.

taser training near me: Time Agency Aaron Frale, 2025-02-28 Fugitive 07760 woke to a busy city street. His memory was blank. A well-dressed man approached him. He left a locked briefcase at 07760's feet. An agent named Nanette tracked 07760. Her agency had been following the anomalous man through time. But the case was different than all the rest. Her well-dressed protégé had given the fugitive the briefcase. A fellow time agent getting involved was cause for panic. 07760's memory came back slowly as the technology in his body began to regenerate his neural pathways. Fragments of a past bubbled to his conscience. He wasn't sure if it was worth reliving. There was a blond woman from years ago, and she disappeared because she was curious. He was on the run because he asked a simple question. "What's the future like?" There was much information about the past. Historians would travel back, blend in, and record "real" history, but 07760 was not allowed to

travel to the future. Why was future travel restricted to some mysterious agency division? There was no time to think. The time agents are on his heels.

taser training near me: Our Life, Our Work, Our Humanness Vincent Dodd, 2024-10-16 We are more divided than ever in too many aspects of life, and we too often feel various levels of emptiness while pushing to keep up or protect ourselves from all that is coming at us. *Our Life, Our Work, Our Humanness* explores our relationships with ourselves and others, and how our stressors and society's negative influences affect and slowly tear us down. What helps is empowering yourself with more and easier options, so the bad effects you less and can even become a powerful lesson to greater peace. Bad will periodically happen to all of us. However, finding more goodness between the bad, and how we handle most of it, can become easier. We, and our lives, are built of emotions, relationships, concerns, expectations, harsh realities, and painfully even politics. Vincent is trusting us to open-up about his thirty-four years of front-line public service in both emergency nursing and law enforcement. He then trusts us further to look at our shared difficulties and tragedies as humans, his personal life mistakes, lessons, observations, and what made it all easier. He validates our issues and pains, then quickly moves to solution-based concepts and functional tools to tame our life stressors. The author writes: I am periodically asked, "With the amount of tragedy and death you have seen, how do you still laugh and love life so?" Sometimes the same question is worded differently, by ending in, ". . . how can you always be so happy?" My answer to the first question is that life is hard, yet an amazing and unfortunately short, powerful journey. So yes, I do find the good, the lessons, and the laughter, as often as I can. My answer to the second question is the same, but it starts with, "I am not always happy . . ." We are human, and that is a messy condition. Sometimes bad is just bad. Yet, seeing and working with the bad from new perspectives can make often help it be much less bad. This book is for those who want less conflict and desire a more meaningful and peaceful life filled with greater joy, exploration, and ease.

taser training near me: Hold the Line Michael Fanone, John Shiffman, 2023-09-12 From a twenty-year police veteran and former Trump supporter who nearly lost his life during the insurrection of January 6th, this instant New York Times bestseller is also an urgent warning that "offers a stark message for this uncertain moment, making crystal clear the urgency and importance of defending our precious democracy" (Nancy Pelosi). When Michael Fanone self-deployed to the Capitol on January 6, 2021, he had no idea his life was about to change. When he got to the front of the line, he urged his fellow officers to hold it against the growing crowd of insurrectionists—until he found himself pulled into the mob, tased until he had a heart attack, and viciously beaten with a Blue Lives Matter flag as shouts to kill him rang out. Now, Fanone is ready to tell the full story of that infamous day, along with exploring our country's most critical issues as someone who has had firsthand experience with many of them. A self-described redneck who voted for Trump in 2016, Fanone's closest friend was an informant—a Black, transgender, HIV-positive woman who has helped him mature and rethink his methods as a police officer. With his unique insight as an undercover detective and intense desire to do the right thing no matter the cost, Fanone provides a nuanced look into everything from policing to race to politics in a way that is accessible across all party lines. Determined to make sure no one forgets what happened at the Capitol on January 6th, Fanone has written a timely and "important" (Kirkus Reviews) call to action for anyone who wants to preserve our democracy for future generations.

taser training near me: Advanced Concepts in Defensive Tactics Chuck Joyner, 2010-12-16 Today's society is becoming increasingly more likely to resist the lawful actions of law enforcement officers. It is critical for officers to have the necessary defensive tactics (DT) skills to successfully overcome resistance in an efficient, safe, and legal manner. The answer to achieving these results is NOT in teaching thousands of possible responses to an infinite number of potential attacks. The answer is to first use a Risk Management approach and identify the most common and dangerous attacks on officers. Next, a successful DT program must stress core concepts, proper body mechanics, natural instinctive movement, and proven principles of survival. *Advanced Concepts in Defensive Tactics: A Survival Guide for Law Enforcement* presents the instruction of Master Police

Instructor Chuck Joyner. Developed during his tenure as a FBI use of force instructor, and expanded by his lifelong dedication to the martial arts, Joyner's Survival Sciences DT program relies on adhering to advanced concepts rather than memorizing countless techniques. Based on extensive research and actual street experience, this manual: Focuses on defensive tactics that are easily taught, understood, and applied by officers regardless of their size, strength, or athletic ability Covers hand-to-hand tactics, groundwork, weapon retention/weapon disarming, handcuffing, and the survival mindset Explains the necessary integration of hands-on DT techniques with common law enforcement secondary weapons (e.g., baton, pepper spray, TASER) Introduces a new use of force model (Dynamic Resistance-Response Model) which correctly depicts the dynamic encounter between an officer and a resistor by first focusing on the level of resistance by the subject Offers practical solutions reducing officer, department, and municipality liability Provides password access to the author's supplemental training videos online Chuck Joyner, a recognized expert in the use of force, lectures throughout the United States and internationally on myriad law enforcement topics. Mr. Joyner holds several FBI instructor certifications in force-related training, has earned black belts in four martial arts, and was awarded master rank in two styles. He was inducted into the Martial Arts Hall of Fame as instructor of the year in 2006. Mr. Joyner was employed by the CIA from 1983 to 1987, and has worked as a Special Agent with the FBI since 1987. taser training near me: *Radical* Xiaolu Guo, 2023-09-12 Xiaolu Guo has been lauded as a "voice . . . speaking with full freedom" (Wall Street Journal), which has made her one of the most acclaimed Chinese-born writers of her generation. She is the National Book Critics Circle Award-winning author of *Nine Continents* and a Granta Best Young British Novelist. Her new memoir, *Radical*, is an exploration of a city, an electrically honest rendering of what it means to be an outsider, and the sojourn that upended her sense of self as a woman, partner, mother, and artist. The world can seem strange and lonely when you step away from your family and everything you have built for yourself. Yet beauty may also appear. In the autumn of 2019, Guo traveled to New York to take up her position as a visiting professor for a year, leaving her child and partner behind in London. What she experienced, however, amidst excursions throughout the city and time spent on her own, was solitude and a destabilizing of self. Her encounter with American culture and people threatened her sense of identity and threw her into a crisis—of meaning, desire, obligation, and selfhood. Radicals, or bushous, are the building blocks of Chinese characters; they are the "root" from which all words get their meaning. In this feminist lexicon, as she threads together her search for creative and personal freedom, Guo illuminates the integral role language plays in forming our sense of self. *Radical* is an individual and etymological journey, and an ardent love letter. It is an expression of one artist's fascination with Western culture and her nostalgia for Eastern landscapes, and an attempt to describe the space in between.

taser training near me: Thin Blue Lie Matt Stroud, 2019-03-19 A wide-ranging investigation of how supposedly transformative technologies adopted by law enforcement have actually made policing worse—lazier, more reckless, and more discriminatory American law enforcement is a system in crisis. After explosive protests responding to police brutality and discrimination in Baltimore, Ferguson, and a long list of other cities, the vexing question of how to reform the police and curb misconduct stokes tempers and fears on both the right and left. In the midst of this fierce debate, however, most of us have taken for granted that innovative new technologies can only help. During the early 90s, in the wake of the infamous Rodney King beating, police leaders began looking to corporations and new technologies for help. In the decades since, these technologies have—in theory—given police powerful, previously unthinkable faculties: the ability to incapacitate a suspect without firing a bullet (Tasers); the capacity to more efficiently assign officers to high-crime areas using computers (Compstat); and, with body cameras, a means of defending against accusations of misconduct. But in this vivid, deeply-reported book, Matt Stroud shows that these tools are overhyped and, in many cases, ineffective. Instead of wrestling with tough fundamental questions about their work, police leaders have looked to technology as a silver bullet and stood by as corporate interests have insinuated themselves ever deeper into the public institution of law enforcement. With a sweeping history of these changes, *Thin Blue Lie* is a must-read for anyone seeking to understand how policing became what it is today.

taser training near me: Police use of tasers Great Britain: Parliament: House of Commons: Home Affairs Committee, Keith Vaz, 2011-03-07 In a brief report, the Home Affairs Committee highlights areas of concern in the supply of Tasers to police forces in England and Wales including the issue of having a monopoly distributor of Tasers. This monopoly supplier had their authority revoked after one of the directors of the company gave an 'unauthorised' Taser to police for use in the hunt for Raoul Moat. Following the revocation of the authority, the Home Affairs Committee held an urgent evidence session in response to suggestions that some police forces were due to run out of Taser stock. During the course of the evidence session, the Committee discovered that a new company had been awarded the authority to supply Tasers to police forces in England and Wales. The Committee expressed concern over a number of issues, including: that police forces in England and Wales were close to running out of Taser cartridges following the revocation of the authority of the original company; that there appeared to be widespread confusion about the parameters of the authority to supply Tasers. Not only did the company distribute an 'unauthorised' Taser to Northumbria Police, it had previously sold the same make of Taser to the National Police Improvement Agency; that the new holder of the authority to supply Tasers to police forces in England and Wales is extensively linked to the former distributor, the new company consisting of

more or less identical personnel operating in the same premises with a near-duplicate website and also concern about the adequacy of a monopoly supplier business model in police procurement and urges the Home Office to examine other options in order to encourage competition and ensure that potential monopoly profits are not given to a particular company or group of individuals.
