To Cure All Hunger looks at the scope and the content of appropriate interventions, growth, income, and command over food security. A close study of the causes, dimensions and consequences of food insecurity in Sudan is instructive, not just for policy in that country but also for food insecurity analysis elsewhere. Studying an extreme case throws up challenges to the conventional wisdom which resonate across less difficult cases. The contributors to this volume bring a wide range of skills and many years' experience to the study. Their focus is mainly on north Sudan and not on the war-torn south. Nevertheless, they do indeed challenge the conventional wisdom, at least in Sudan.

taylor swift karma analysis: The Face of the Firm Michele Gregory, 2016-02-12 Despite

decades of greater gender awareness at work in Western countries, gender inequality in the executive suites is alive and well. The Face of the Firm highlights new critical perspectives on the relationship between hegemonic masculine cultures, gender embodiment, and gender disparities in corporate organizations. Using data from over 100 interviews with female and male executives who worked for some of the most prestigious advertising and computer firms in the world, the book makes important connections between the empirical data and contemporary sexism in the United States and United Kingdom. The book refocuses the debate of executive work, organizational spaces, and gender inequality on gendered bodies at work. It also demonstrates that gendered and sexualized relations among executives often construct the production process. The book makes a contribution to masculinity, gender, and work scholarship and is organized along three key concepts: homogeneity, homosociability, and heterosexuality. These address such factors as the organizational locker room, sexual and heterosexual spaces at work, and the construction of women and men as different workers. This conceptual model is crucial for evaluating the mechanisms that support male dominance among highly skilled professionals and executives.

taylor swift karma analysis: The Third City (Routledge Revivals) Borna Bebek, 2014-02-04 The Third City, first published in 1982, offers an innovative response to the troubled relationship between Western philosophy, as it has been conducted since the Renaissance, and the everyday lives of the communities in which we live. Bebek contends that the model of philosophical reflection is to be found in Plato's dialogues, which, rather than simply describing utopia through a series of abstract 'concepts', were instead designed to impel the learner towards a recognition of the true nature of reality – as much a 'self-recognition' as an understanding of the world 'out there'. Thus, in order to revive the spirit of true philosophy, it is necessary to avoid both the false extremes of idealism and materialism, and to allow ethics once more to merge with epistemology. This title presents an exposition of this ethically based philosophy, allowing the very human insights of Plato to illumine the diverse problems of today.
