The book also provides evidence for the diversity of materials development around the globe at different levels for different specialities and for different purposes. Each chapter surveys the relevant literature (such as task-based learning and language and culture), describes a specific research project, reports the results of the project, and discusses the implications of these results for the development of materials both in the local context and in general. After each section there are editorial comments highlighting the issues emerging from the research, and there is a conclusion which connects the findings of the various chapters and makes suggestions both for future research and for the principled development of materials for L2 learners. The book will be suitable for teachers, materials developers, academics and students in post-graduate courses in applied linguistics, in TEFL/TESOL and in the teaching of other languages as an L2.

why is it important to study english language: *Multilingual Sydney* Alice Chik, Phil Benson, Robyn Moloney, 2018-11-07 The rise of global mobility has had a deep impact on the study of urban multilingualism. Once associated with research on minority speech communities and inner-city ethnolinguistic enclaves (Chinatowns, Little Italies, etc), it is now concerned much more with the use of multiple languages in diverse neighbourhoods across the city. In this book the authors take an innovative approach that builds on previously published work in two ways. First, it focuses on a single city and, second, it adopts a multidisciplinary approach to multilingualism. By examining the phenomenon of multilingualism in a single city from a range of perspectives this book paints a more comprehensive picture of the current dimensions of urban multilingualism. A unique feature of this book is the inclusion of contributions from scholars with expertise in education, geography, media, health communication and international studies, in addition to community practitioners. Sydney is the largest city in Australia and, on most counts, it is also among the most linguistically diverse cities in the world. As such it is an ideal site for a multidisciplinary study of urban multilingualism. The selection of 18 multidisciplinary case studies on multilingualism in Sydney, Australia represents some of the strongest and most innovative research on urban multilingualism in the world today. This book examines how multilingualism permeates institutional and everyday practice in the city, raising important questions about what a 'multilingual city' can and should be.

This book is based on two-and-a-half years of ethnographic field research Hurtig conducted in the Andean region of Venezuela between 1991 and 1993, and again briefly in 1996.
