Central to the study are adult L2 learners, who are still a largely under-researched and growing group of learners, and readers will gain a better understanding of the learning process of this specific group of learners and ideas for sustaining L2 adult learning motivation in continuing education settings. Furthermore, the book discusses the role played by the Italian migrant community in Australia in making Italian a sought-after language to learn. trajectories are affected by the presence of migrant groups.

why learn italian language: Identity and Language Learning Bonny Norton, 2013-10-04 Identity and Language Learning draws on a longitudinal case study of immigrant women in Canada to develop new ideas about identity, investment, and imagined communities in the field of language learning and teaching. Bonny Norton demonstrates that a poststructuralist conception of identity as multiple, a site of struggle, and subject to change across time and place is highly productive for understanding language learning. Her sociological construct of investment is an important complement to psychological theories of motivation. The implications for language teaching and teacher education are profound. Now including a new, comprehensive Introduction as well as an Afterword by Claire Kramsch, this second edition addresses the following central questions: - Under what conditions do language learners speak, listen, read and write? - How are relations of power implicated in the negotiation of identity? - How can teachers address the investments and imagined identities of learners? The book integrates research, theory, and classroom practice, and is essential reading for students, teachers and researchers in the fields of language learning and teaching, TESOL, applied linguistics and literacy. This book is open access under a CC BY ND licence.

why learn italian language: **Language Planning and Student Experiences** Joseph Lo Bianco, Renata Aliani, 2013-06-28 This book is a timely comparison of the divergent worlds of policy implementation and policy ambition, the messy, often contradictory here-and-now reality of languages in schools and the sharp-edged, shiny, future-oriented representation of languages in policy. Two deep rooted tendencies in Australian political and social life, multiculturalism and Asian regionalism, are represented as key phases in the country's experimentation with language education planning. Presenting data from a five year ethnographic study combined with a 40 year span of policy analysis, this volume is a rare book length treatment of the chasm between imagined policy and its experienced delivery, and will provide insights that policymakers around the world can

draw on.
