The collection draws on expert knowledge of key media and communication scholars in Africa and the diaspora, offering a counter-narrative to existing Western and Eurocentric discourses of knowledge-production. As the decolonial turn takes centre stage across Africa, this collection further rethinks media and communication research in a post-colonial setting and provides empirical evidence as to why some of the methods conceptualised in Europe will not work in Africa. The result is a thorough appraisal of the current threats, challenges and opportunities facing the discipline on the continent.

why study communication studies: The International History of Communication Study Peter Simonson, David W. Park, 2015-10-14 The International History of Communication Study maps the growth of media and communication studies around the world. Drawing out transnational flows of ideas, institutions, publications, and people, it offers the most comprehensive picture to date of the global history of communication research and education. This volume reaches into national and regional areas that have not received much attention in the scholarship until now, including Asia, Latin America, Africa, and the Middle East alongside Europe and North America. It also covers communication study outside of academic settings: in international organizations like UNESCO, and among commercial and civic groups. It moves beyond the traditional canon to cover work by forgotten figures, including women scholars in the field and those outside of the United States and Europe, and it situates them all within the broader geopolitical, institutional, and intellectual landscapes that have shaped communication study globally. Intended for scholars and graduate students in communication, media studies, and journalism, this volume pushes the history of communication study in new directions by taking an aggressively international and comparative perspective on the historiography of the field. Methodologically and conceptually, the volume breaks new ground in bringing comparative, transnational, and global frames to bear, and puts under the spotlight what has heretofore only lingered in the penumbra of the history of communication study.

why study communication studies: *Communication Research into the Digital Society* Theo Araujo, Peter Neijens, 2025-10-01 Media and communication have become ubiquitous in today's societies and affect all aspects of life. On an individual level, they impact how we learn about the world, how we entertain ourselves, and how we interact with others. On an organisational level, the interactions between media and organisations, such as political parties, NGOs, businesses and brands, shape organisations' reputation, legitimacy, trust and (financial) performance, as well as individuals' consumer, political, social and health behaviours.
