wild turkey science podcast: The Most Dangerous Cinema Bryan Senn, 2013-11-01 People hunting people for sport--an idea both shocking and fascinating. In 1924 Richard Connell published a short story that introduced this concept to the world, where it has remained ever since--as evidenced by the many big- and small-screen adaptations and inspirations. Since its publication, Connell's award-winning *The Most Dangerous Game* has been continuously anthologized and studied in classrooms throughout America. Raising questions about the nature of violence and cruelty, and the ethics of hunting for sport, the thrilling story spawned a new cinematic subgenre, beginning with RKO's 1932 production of *The Most Dangerous Game*, and continuing right up to today. This book examines in-depth all the cinematic adaptations of the iconic short story. Each film chapter has a synopsis, a How Dangerous Is It? critique, an overall analysis, a production history, and credits. Five additional chapters address direct to video, television, game shows, and almost dangerous productions. Photographs, extensive notes, bibliography and index are included.

wild turkey science podcast: An Anthropogenic Table of Elements Timothy Neale, Courtney Addison, Thao Phan, 2022-08-31 An Anthropogenic Table of Elements provides a contemporary rethinking of Dmitri Mendeleev's periodic table of elements, bringing together elemental stories to reflect on everyday life in the Anthropocene. Concise and engaging, this book provides stories of scale, toxicity, and temporality that extrapolate on ideas surrounding ethics, politics, and materiality that are fundamental to this contemporary moment. Examining elemental objects and forces, including carbon, mould, cheese, ice, and viruses, the contributors question what elemental forms are still waiting to emerge and what political possibilities of justice and environmental reparation they might usher into the world. Bringing together anthropologists, historians, and media studies scholars, this book tests a range of possible ways to tabulate and narrate the elemental as a way to bring into view fresh discussion on material constitutions and, thereby, new ethical stances, responsibilities, and power relations. In doing so, An Anthropogenic Table of Elements demonstrates through elementality that even the smallest and humblest stories are capable of powerful effects and vast journeys across time and space.

The stories we tell about our past matter. But those stories have been shaped by prejudice, hoaxes and misinterpretations that have whitewashed entire chapters of history, erased women and invented civilisations. Today history is often used to justify xenophobia, nationalism and inequality as we cling to grand origin stories and heroic tales of extraordinary men. Exploring myths, mysteries and misconceptions about the past - from the legacies of figures like Pythagoras and Christopher Columbus, to the realities of life in the gun-toting Wild West, to the archaeological digs that have upset our understanding of the birth of civilisation - David Mountain reveals how ongoing revolutions in history and archaeology are shedding light on the truth. Full of adventures, and based on detailed research and interviews, Past Mistakes will make you reconsider your understanding of history - and of the world today. 'Past Mistakes takes what we think we remember from history class and sets the record straight! wild turkey science podcast: Wild Turkeys: Nature's Nervous Birds! Dr. Richard A. NeSmith, 2020-11-30 Turkeys are All-American birds, predating the European settlers. Turkeys, though misnamed, are a historical part of America and American Culture. These birds are the largest land birds, the most hunted, and nearly were lost to extinction by the late 1930s. They have keen eyesight (in color), keen hearing, and their reflex/reaction time puts humans to shame. This ability to avoid and outsmart hunters, avoid detection with camouflage feathers, and successfully reproduce offspring comes with a price. They are one of the most alerted, alarmed, and anxious birds in the forest. They are nature's nervous birds, but they will leave and disappear from the scene before you barely get a second look at them.

wild turkey science podcast: *America, Wild Turkeys and Mongrel Dogs* Kenny Morgan, 2014-11-01 Morgan's humorous and resource-filled collection of essays centers on turkey hunting, wildlife behavior, and growing up in the small Louisiana town of Jackson in the mid-20th century. A mixed breed of a book, it's what you get when you cross the roguish, homespun charm of a master storyteller with the wisdom of a master hunter, turkey caller maker, inventor, naturalist, and teacher-philosopher. With humility and humor the late Kenny Morgan (1946-2011) uses the antics of his lovable, but uncivilized childhood mongrel dog, Buster, as allegory for human nature, with the gentle reminder that how you act matters. Morgan offers a witty examination of simpler times, giving voice to characters and shenanigans of his colorful life, with relevance -- life lessons -- for our time. The book's format pairs lush images of wildlife and American landscapes with Morgan's thoughtful musings on 50+ years of pursuing the wild turkey--and the practice he's learned along the way to live artfully. My intent is to set standards by teaching the artistry of the hunt: practicing cleverness and integrity in the pursuit of wild things, he says. Indeed, the book brims with expert wild turkey-calling and -hunting technique. But its real beauty comes through Morgan's captivating observations of wildlife, told with vivid tales that ensnare hunters and non-hunters alike with fascinating insights, such as how animals communicate--even across species--to look out for one another. Even more, it's about applying principles learned in the wild to cultivate decency with choices we make on the paths of the everyday. Anyone who appreciates a story well-told and compelling art photographs, or someone looking for first-rate tips to call up and bag a gobbler, will

find this book a valuable addition to their library, nightstand, or coffee table. America, Wild Turkeys & Mongrel Dogs is a celebration of the joy that is all around us.
