Among those who settled in the area were ten architects looking to make their marks on the world. Claud Beelman, a man who never received a college degree, would go on to design the Elks Lodge in Los Angeles. Albert C. Martin, architect of Grauman's Million Dollar Theater, founded a company that is still going strong more than one hundred years later, and Julia Morgan, the first woman architect licensed in California, was hired by William Randolph Hearst to design the Examiner Building. Join author Antonio Gonzalez as he tells the stories of the people behind some of Southern California's most iconic buildings.

Morgan, America's first truly independent female architect, left a legacy of more than 700 buildings, many of which are now designated landmarks, in cities throughout California, as well as in Hawaii, Utah, and Illinois. Her work spanned five decades, and the total of her commissions was greater than any other major American architect, including Frank Lloyd Wright. This book tells the remarkable story of this architectural pioneer, and features text, drawings, and photographs of the many buildings that still exist.

william a randolph construction: *San Francisco's Market Street* Marques Vickers, Market Street forms the vertebrae of San Francisco. First surveyed in 1847 by Jasper O'Farrell, the boulevard was laid out to provide a transition between two opposing grids. Intended to become the city's main and widest thoroughfare, it rapidly became the busiest. In the mid 19th century, San Francisco was regarded as the most developed western American outpost of urbanity, sophistication and refinement. By the conclusion of the century, its reputation rivaled many East Coast cities. Market Street became the base for cable car and horse car lines providing service along the local commercial corridor and connections to distant transfer destinations. The 1906 catastrophic San Francisco Earthquake and Fire briefly halted development. During the reconstruction, the Market Street cable car lines would be entirely removed and replaced by electric streetcars. Automobiles would replace streetcars. During the 1970s, the introduction of the subterranean Bay Area Rapid Transit system (BART) alleviated some of the traffic congestion. This edition is an architectural survey of Market Street's historical and contemporary buildings accompanied by historical profiles. Byron, 2018-02-01 This expanded and updated edition of a local best-seller offers more revealing rambles through one of America's most fascinating cities. Berkeley Walks celebrates the things that make Berkeley such a wonderful walking city—diverse architecture, panoramic views, tree-lined neighborhoods, unusual gardens, secret pathways, hidden parks, and vibrant street life. Historical

surprises and architectural delights include the apartment building from which Patty Hearst was kidnapped; Ted Kaczynski's home before he became the Unabomber; and the residences of Nobel laureates and literary Berkeleyans such as Thornton Wilder, Ann Rice, and Philip K. Dick. Bob Johnson and Janet Byron—longtime city residents and tour guides—have added 3 new walks, extensively revised 6 others, and updated all the rest. These 21 walks showcase the many elements that make Berkeley's neighborhoods, shopping districts, and academic areas such fun to explore. Visitors will discover a vibrant community beyond the University of California campus borders; locals will be surprised and charmed by the treasures in their own backyards. Highlights of the book include features on architects such as John Galen Howard, Bernard Maybeck, and Julia Morgan; more than 100 archival and original photos; and detailed maps with hundreds of points of interest on these easy-to-follow, self-guided walking tours.

william a randolph construction: The Landmarks of New York, Fifth Edition Barbaralee Diamonstein-Spielvogel, 2011-09-01 As the definitive resource on the architectural history of New York City, The Landmarks of New York, Fifth Edition documents and illustrates the 1,276 individual landmarks and 102 historic districts that have been accorded landmark status by the New York City Landmarks Preservation Commission since its establishment in 1965. Arranged chronologically, by date of construction, the book offers a sequential overview of the city's architectural history and richness, presenting a broad range of styles and building types: colonial farmhouses, Gilded Age mansions, churches, schools, libraries, museums, and the great twentieth-century skyscrapers that

are recognized throughout the world. That so many of these structures have endured is due, in large measure, to the efforts of the New York City Landmarks Preservation Commission. Since the establishment of the commission, New York City has become the leader of the preservation movement in the United States, with more buildings and districts designated and protected than in any other city. Included here are such iconic structures as Grand Central Station, the Chrysler Building, the Metropolitan Museum of Art, and Carnegie Hall, as well as those that may be less well known but are of significant historical and architectural value: the Pieter Claesen Wyckoff House in Brooklyn, the oldest structure in New York City; the Bowne House in Queens, the birthplace of American religious freedom; the Watchtower in Marcus Garvey Park in Harlem; the New York Botanical Garden in The Bronx; and Sailors Snug Harbor on Staten Island. In addition to completely updated maps and descriptions of each landmark and historic district included in the previous editions, the fifth edition adds 183 new individual landmarks and 39 new historic district maps.

william a randolph construction: The Lady from the Black Lagoon Mallory O'Meara, 2019-03-05 This acclaimed biography shines a light on a trailblazing woman who created a classic movie monster—and the author's quest to rescue her from obscurity. As a teenager, Mallory O'Meara was thrilled to discover that one of her favorite movies, *Creature from the Black Lagoon*, featured a monster designed by a woman, Milicent Patrick. But while Patrick should have been hailed as a pioneer in the genre, there was little information available about her. As O'Meara discovered, Patrick's contribution had been claimed by a jealous male colleague and her career had been cut short. No one even knew if she was still alive. As a young woman working in the horror film industry, O'Meara set out to right the wrong, and in the process discovered the full, fascinating story of an ambitious, artistic woman ahead of her time. Patrick's contribution to special effects proved to be just the latest chapter in a remarkable, unconventional life, from her youth growing up in the shadow of Hearst Castle, to her career as one of Disney's first female animators. And at last, O'Meara discovered what really had happened to Patrick after *The Creature's* success, and where she went. A true-life detective story and a celebration of a forgotten feminist trailblazer, Mallory O'Meara's *The Lady from the Black Lagoon* establishes Patrick in her rightful place in film history while calling out a Hollywood culture where little has changed since.
