wilder post fight interview: Beyond the Boundaries Georgia A. Persons, 2017-09-29 In the past, African American aspirations for political office were assumed to be limited to areas with sizeable black population bases. By and large, black candidates have rarely been successful in statewide or national elections. This has been attributed to several factors: limited resources available to African American candidates, or identification with a black liberationist ideological thrust. Other factors have been a relatively small and spatially concentrated primary support base of black voters, and the persistent resistance of many white voters to support black candidates. For these reasons, the possibility of black candidates winning elections to national office was presumably just a dream. Conventional wisdom conceded a virtual cap on both the possible number of black elected officials and the level of elective office to which they could ascend. But objective political analysis has not always made sufficient allowances for the more universal phenomenon of individual political ambitions. The contributors to this volume explore the ways ambitious individuals identified and seized upon strategies that are expanding the boundaries of African American electoral politics. This volume is anchored by a symposium that focuses on new possibilities in African American politics. Both the electoral contests of 2006 and the Barack Obama presidential campaign represent an emergent dynamic in American electoral politics. Analysts are beginning to agree that the contours of social change now make the electoral successes of black candidates who are perceived as ideologically and culturally mainstream increasingly likely. The debate captured in this volume will likely inspire further scholarly inquiry into the changing nature and dimensions of the larger dynamic of race in American politics and the subsequent changing political fortunes of African American candidates.

wilder post fight interview: *The Mind Mappers* Eric Andrew-Gee, 2025-05-27 NATIONAL BESTSELLER The riveting true story of the star-crossed friendship between two neuroscientists—one famous, the other forgotten—who mapped the brain, but lost each other. In the early 1920s, when neurosurgery was more likely to be a death sentence than a cure, two men revolutionized the study of the brain: Wilder Penfield and William Cone. Drawn together by their shared fascination with the “undiscovered country” inside our heads, the surgeons formed a partnership and within ten years established the Montreal Neurological Institute in a Gothic stone hospital on the slope of a mountain. The Neuro soon became the world’s leading centre for neurological study, attracting men and women from across the globe to a booming mid-century city. But their success came at the cost of their friendship. While Cone spent long hours at patients’ bedsides and in the blood-spattered operating room, Penfield pursued the loftier goal of discovering the seat of consciousness. The Chief, as he was known, went on to develop the Montreal procedure for treating epilepsy, which helped identify the source of speech, executive function and memory in narrow slivers of grey matter—achievements that illuminated the relationship between mind and body, made possible by Cone’s anonymous work behind the scenes. Over time, their relationship became fraught with personal and professional hurts—and suddenly ended when Cone was found dead in his office at the age of sixty-two. In this compelling dual biography, Globe and Mail journalist Eric Andrew-Gee weaves together the rich history of The Neuro with that of Penfield and Cone to reveal the untold story of one of the birthplaces of neuroscience. In doing so, he breathes new life into a familiar hero and revives the tragic, forgotten story of his partner, writing Dr. William Cone back into the historical record at last.

wilder post fight interview: *An Expendable Man* Margaret Edds, 2006-10 How is it possible for an innocent man to come within nine days of execution? *An Expendable Man* answers that question through detailed analysis of the case of Earl Washington Jr., a mentally retarded, black farm hand who was convicted of the 1983 rape and murder of a 19-year-old mother of three in Culpeper, Virginia. He spent almost 18 years in Virginia prisons--9 1/2 of them on death row--for a murder he did not commit. This book reveals the relative ease with which individuals who live at society's margins can be wrongfully convicted, and the extraordinary difficulty of correcting such a wrong once it occurs. Margaret Edds makes the chilling argument that some other expendable men almost certainly have been less fortunate than Washington. This, she writes, is the secret, shameful underbelly of America's retention of capital punishment. Such wrongful executions may not happen often, but anyone who doubts that innocent people have been executed in the United States should remember the remarkable series of events necessary to save Earl Washington Jr. from such a fate.

One of the best books ever written about the movies. —Tom Ryan, *The Age* The most exhilarating work of revisionist film history since Pauline Kael's *Citizen Kane*. . . . May's take on what movies once were (energizing, as opposed to enervating), and hence can become again, is enough to get you believing in them again as one of the regenerative forces America so sorely needs.—Jay Carr, *Boston Globe* A startling, revisionist history of Hollywood's impact on politics and American culture. . . . A convincing and important addition to American cultural criticism.—Publishers Weekly A controversial overview of 30 years of American film history; must reading for any serious student of the subject.—Choice A provocative social history of Hollywood's influence in American life from the

1930s to the 1950s. May argues persuasively that movies in the period offered a good deal of tough criticism of economic and social conditions in U.S. society. . . . May challenges us to engage in some serious rethinking about Hollywood's impact on American society in the middle of the twentieth century.—Robert Brent Toplin, *American Historical Review*

wilder post fight interview: *Not Paved for Us* Camika Royal, 2022-07-19 Winner of the 2024 AERA Outstanding Book Award *Not Paved for Us* chronicles a fifty-year period in Philadelphia education, and offers a critical look at how school reform efforts do and do not transform outcomes for Black students and educators. This illuminating book offers an extensive, expert analysis of a school system that bears the legacy, hallmarks, and consequences that lie at the intersection of race and education. Urban education scholar Camika Royal deftly analyzes decades of efforts aimed at improving school performance within the School District of Philadelphia (SDP), in a brisk survey spanning every SDP superintendency from the 1960s through 2017. Royal interrogates the history of education and educational reforms, recounting city, state, and federal interventions. She covers SDP's connections with the Common School Movement and the advent of the Philadelphia Freedom Schools, and she addresses federal policy shifts, from school desegregation to the No Child Left Behind and Every Student Succeeds Acts. Her survey provides sociopolitical context and rich groundwork for a nuanced examination of why many large urban districts struggle to implement reforms with fidelity and in ways that advance Black students academically and holistically. In a bracing critique, Royal bears witness to the ways in which positive public school reform has been obstructed: through racism and racial capitalism, but also via liberal ideals, neoliberal practices, and austerity tactics. Royal shows how, despite the well-intended actions of larger entities, the weight of school reform, here as in other large urban districts, has been borne by educators striving to meet the extensive needs of their students, families, and communities with only the slightest material, financial, and human resources. She draws on the experiences of Black educators and community members and documents their contributions. *Not Paved for Us* highlights the experiences of Black educators as they navigate the racial and cultural politics of urban school reform. Ultimately, Royal names, dissects, and challenges the presence of racism in school reform policies and practices while calling for an antiracist future.

wilder post fight interview: Southern Politics in the 1990s Alexander P. Lamis, 1999-08-01 During the 1990s, the Republican party surged to majority status in the South after two decades of struggling unevenly to become established in the formerly one-party Democratic section of the country. In this comprehensive, up-to-date study, seasoned observers tell the fascinating story of the GOP's remarkable advance at the regional level and in each of the eleven states of the former Confederacy, effectively capturing the current partisan dynamics at work throughout Dixie. In *Southern Politics in the 1990s* eleven teams of political scientists and journalists—all of them long-time observers of the political scene in their own states—offer individual chapters that closely examine partisan and electoral developments in each southern state. Alexander P. Lamis frames the state discussions with introductory and concluding chapters that highlight the evolution of the two-party South and the political transformation the region as a whole underwent during the decade of the 1990s. Together, the authors show that the amazing Republican spurt was fueled by many factors, including the ongoing entrenchment of the partisan competition begun three decades earlier; the national Republican sweep of 1994 that affected all regions of the country equally; and the successful efforts of Republicans to paint the Democrats as hopelessly mired in a corrupt political system and themselves as untainted reformers who represent the future. However, as the separate state chapters illustrate, the pace of change differed from state to state. For example, South Carolina was an early Dixie leader in the GOP's growth in the 1990s, but Arkansas caught the wave only in the middle of the decade. Offering in-depth political analysis on both the state and the

regional level, Southern Politics in the 1990s reveals that the 1990s revolution in southern politics gave the country, for the first time since the 1850s, a truly national party system. The book will prove essential to anyone interested in southern politics at the dawn of the twenty-first century.

wilder post fight interview: *The Day After* Brendan R. Gallagher, 2019-09-15 Since 9/11, why have we won smashing battlefield victories only to botch nearly everything that comes next? In the opening phases of war in Afghanistan, Iraq, and Libya, we mopped the floor with our enemies. But in short order, things went horribly wrong. We soon discovered we had no coherent plan to manage the day after. The ensuing debacles had truly staggering consequences—many thousands of lives lost, trillions of dollars squandered, and the apparent discrediting of our foreign policy establishment. This helped set the stage for an extraordinary historical moment in which America's role in the world, along with our commitment to democracy at home and abroad, have become subject to growing doubt. With the benefit of hindsight, can we discern what went wrong? Why have we had such great difficulty planning for the aftermath of war? In *The Day After*, Brendan Gallagher—an Army lieutenant colonel with multiple combat tours to Iraq and Afghanistan, and a Princeton Ph.D.—seeks to tackle this vital question. Gallagher argues there is a tension between our desire to create a new democracy and our competing desire to pull out as soon as possible. Our leaders often strive to accomplish both to keep everyone happy. But by avoiding the tough underlying decisions, it fosters an incoherent strategy. This makes chaos more likely. *The Day After* draws on new interviews with dozens of civilian and military officials, ranging from US cabinet secretaries to four-star generals. It also sheds light on how, in Kosovo, we lowered our postwar aims to quietly achieve a surprising partial success. Striking at the heart of what went wrong in our recent wars, and what we should do about it, Gallagher asks whether we will learn from our mistakes, or provoke even more disasters? Human lives, money, elections, and America's place in the world may hinge on the answer.
