Millenson, 2018-06-01 *Demanding Medical Excellence* is a groundbreaking and accessible work that reveals how the information revolution is changing the way doctors make decisions. Michael Millenson, a three-time Pulitzer Prize nominee as a health-care reporter for the Chicago Tribune, illustrates serious flaws in contemporary medical practice and shows ways to improve care and save tens of thousands of lives. If you read only one book this year, read *Demanding Medical Excellence*. It's that good, and the revolution it describes is that important.—Health Affairs Millenson has done yeoman's work in amassing and understanding that avalanche of data that lies beneath most of the managed-care headlines. . . . What he finds is both important and well-explained: inconsistency, overlap, and inattention to quality measures in medical treatment cost more and are more dangerous than most cost-cutting measures. . . . [This book] elevates the healthcare debate to a new level and deserves a wide readership.—Library Journal An involving, human narrative explaining how we got to where we are today and what lies ahead.—Mark Taylor, Philadelphia Inquirer Read this book. It will entertain you, challenge, and strengthen you in your quest for better accountability in health care.—Alex R. Rodriguez, M.D., American Journal of Medical Quality Finally, a health-care book that doesn't wring its hands over the decline of medicine at the hands of money-grubbing corporations. . . . This is a readable account of what Millenson calls a 'quiet revolution' in health care, and his optimism makes for a refreshing change.—Publishers Weekly With meticulous detail, historical accuracy, and an uncommon understanding of the clinical field, Millenson documents our struggle to reach accountability.—Satya Satya-Murti, M.D., Journal of the American Medical Association

williamson health medical group internal medicine: Transformative Learning in Healthcare and Helping Professions Education Teresa J. Carter, Carrie J. Boden, Kathy Peno, 2019-05-01 Transformative Learning in Healthcare and Helping Professions Education: Building Resilient Professional Identities is a co-edited book (Carter, Boden, and Peno) with invited chapters from educators who share our passion for learning in healthcare and the helping professions. The purpose of the book is to introduce professional learners (students, residents, and others in professional training) to transformative learning for building resilient professional identities amid practice environments that include widespread burnout and compassion fatigue. With a diverse set

of authors engaged in clinical and educational practice in academic medicine, nursing, dentistry, physical therapy, mental health counseling, science education, psychology, social work, and inter-professional collaborative practice, we offer strategies for building resilience throughout the years of professional training and into professional practice. We do so through the experiences of authors involved in healthcare and the helping professions to illustrate how some are coping with the challenges of burnout and compassion fatigue through learning that can be transformative. This book explores the nature of professional identity formation by examining ways that professionals in training can thrive amid the challenges of today's stressful practice environments. First-hand stories of resilience illustrate how learners, as well as educators in these professions, are addressing adversity, career decision-making, service to the underserved, and the self-care needed to provide excellent care for others. The prominence of transformative learning within adult learning theory is illustrated for its potential to revise the meaning that learners make of their experiences and open up new possibilities for renewed vitality in professional education and practice environments. The book has two primary audiences: professional learners in healthcare and helping professions education, and their educators who are often professional practitioners themselves. These educators have a significant role in influencing the next generation of professionals by serving as mentors, role models, and teachers. The importance of fostering learning that is transformative has never been more important than it is today for those who will work in these demanding professions. We invite readers to discover experiences and strategies for achieving individual wellbeing, as well as opportunities for building a culture within professional education and practice settings that will foster resilience.
